FREEMASONRY

VERY DISTINGUISHED AND SUBLIME GRAND MASTER
THE
"GREAT UNIVERSAL BROTHERHOOD"**

INTRODUCTION

First of all you need to know that above our Lodges, our temples, our Grand Orients and our Rites, has always been a Universal Address Initiation a Great Universal Freemasonry or Eastern esoteric, whose Cons.: Sup. compound true Initiates, receives the line Policy Saints Shrines own Esoteric to transmit then through certain intermediaries more bodies exoteric.

We are sure that most of our Bro. M.: is admire this, they never having heard of such Address Superior. As for those who know and who keep jealously in his heart to be faithful to his promise, will produce scandal such disclosure. To observe serenity. We can These new elements that come to reassure them.

All those who like us belong to Sup. Cons.: From Gr. College of Rites, know that since this has recently Senior Management, in view of the deformation of the true Spirit Masonic today, has decided to intervene after nearly two centuries of voluntary silence, and sent the world a **X Power** with the mission to renew and restore the Sacred Word that disappears more and more of our Temples, giving place to the ignorance and fanaticism.

Of course there is no question to reveal the name of this **Power** as its meaning implies, although it should be entirely unknown, nor is it to give more precise details on the **Sublime Agency** that sends. Otherwise if we wanted to, We could not do it, a truly Iniciático silence, preserves all curious attempt profane world.

This Global Management organizes and directs the various secret societies, at all times has had its ramifications all countries, allowing perpetuate Initiation Tradition millennia. The origin is lost in the mists of time as we will see in the first chapter, but at the same time there has been

gradually societies formed and separated from it

As the Great Masters founders disappeared. Not there already full of such partnerships with the Central Power Initiator. This is why symbols are identical in various secret sects. Indeed, the founders have been different, but above the ritual or dogma that founded and which consecrated themselves, they all came from the same origins and the same source of the Sanctuaries.

Disclose the fact that, strictly preserving secret until today, it is for cosmic reasons just enter a new era in which much of what was hidden will be manifested.

The decision of the Universal Freemasonry not only responds an imperative but also and especially by reason of universal.

The present work aims to open the eyes of the H: M: about many confusing and often obscure points of our Order.

We have to emphasize that this book, as its name suggests, has Color powder and not ignore this fact he will create some stir in all Masonic media. For this reason we make a point of paramount importance.

The "average" Mason will experience some difficulties in understanding of the first chapter, but these difficulties will disappear quickly and smoothly as it will only be triggered and teachings that until now seemed to have received a consecration formal, irrefutable, intangible ...

It is known that all the officers, and even religious teachings Masonic imperiously argue that civilization, with all its humanitarian and initiatory profit, comes from the East.

This is a serious error of principle, based on appearances misleading and very concerning.

It is true that we can now say that in recent two thousand years the West has lived intellectually and spiritually based on the East. And the example of the Christian religion is enough. Indeed, Christianity is a mixture of Zoroastrianism, Brahmanism and Buddhism. The "Roman" Catholic religion has taken lent to the old Indian Buddhism: the Mass, the rosary, the candles, the incense, convents, monks, perpetual adoration, the chapels, etc of Zoroastrianism (Zend-Avesta) has taken hell paradise, the devil and guardian angels. It is a doctrine entirely religious oriental origin.

-

But the East has only been a temporary repository of teachings of Western origin who were entrusted makeup White tossed the native soil as a result of seizures or terrestrial cataclysms and took refuge in part, to the East, still in darkness, even at night, even in the brain dream ... Long after the Eastern peoples have awakened and having been entrusted all Initiation Tradition, the descendants of old white immigration were reconstituted in ethnological groups in regions called iranianas and turned to the virgins and ignorant spirit, ancestral lands after have rested on a spiritually beneficial oblivion.

Thus, the West before falling asleep, he conveyed his wisdom to East on the eve of disappearing civilization.

This also naturally leads to the recognition of the North (or Colleges North) as the source of positive initiatory teaching objective, scientific and West, while the South should be considered passive, mystical, contemplative and Eastern.

This is a principle that must be admitted after long Masons and time must be made to this entry warn that ignores this Initiation Truth.

Another caveat you need to do is on Hiram.

Many indeed of H:. M:. firmly believe that this is A more or less historical character, but when it is not a symbol. To be undeceived. After workers spiritual were initiated to build the Temple of Truth, Hiram was shot many times but always risen. Hiram is Adonis killed by a wild boar, is Pythagoras proscribed, is Osiris killed by Typhon, Orpheus is torn by drunk, is Jesus crucified by Caiaphas, Pilate and Judas Iscariot, is finally Jacques (Santiago) de Molay sentenced by a Pope, denounced by a false brother and burned by order of the King. Naturally this is not one explanation among many others, because if one that the name of Hiram has a relationship with fire (for not forget that he smelter, ie working with the metal fire), allegory of death correspond to regeneration or transmutation by the same element (Fire Domestic!). Thus all whatever symbols always have interpretations different and explanations which we will analyze in the third chapter are the most affordable to our plan, because this book is not but a slight appreciation, a kind of introduction to the manual Masonic esotericism which is in preparation and will comprise

all the secrets of symbols and the true mechanism Iniciático
our institution

1

Another observation to make, which ignore the most
our brother Masons and confirms once again
our previous statements concerning Higher Management. This is
For 120 Rites mentioned by the author in the second
chapter. It is understandable, in view of all these branches have
manifested in one century (from the beginning of the eighteenth
early nineteenth) that the Order had been given the power to
declared.

It is observed that all that comes to obey an Authority, all
these lodges that are installed to work publicly to denote
clarify a Central Organization, a Body Director who gives a pass to
the opening of the Temples of Initiation. It is also evident that
certain individuals have slipped or introduced into the stream and have
established on their own masonries who have not had long
life, as it is well understood that all the founders of rites not
were always members of the Corps Director of the Great Brotherhood.
The real Grandmasters are not always those
appear clothed with all authority, powers behind
representative of the titles and functions are the patriarchs,
True Venerables, Powers, who run the same
time all the rites of the world because they are at the head
truly of Universal Freemasonry.

To make the presentation of this book, fully self
it is credited, then give a copy of a recent
Message to Congress International des Forces de l'Esprit (Congress
International Forces of the Spirit) held in Paris in
May 1949.

See, hear and silence are the three requirements that must be observed
in the course of reading the pages that are to follow.

Venerable MESSAGE AND ILLUSTRIOUS GRAND MASTER
Serge Raynaud de la Ferriere.
(Communication read at the International Congress of Forces

Spirit, in Paris on May 25, 1949)

Ladies and gentlemen, Members

Spiritual Sisters and Brothers,

Great Family Members:

THE GLORY OF THE GREAT ARCHITECT OF THE UNIVERSE ...

We will allow us to make a necessary clarification in these

times of anxiety and in this place will be deliberated on

spiritual future of the world.

The formation of a is lost in the mists of time

Fraternity wanted to raise Human test above the

normal human condition. It would be tedious to write the history of this

Always be sought Institution Thinkers and Sages.

The tests by which the Order had to spend confers

Today, on behalf of its Martyrs, permission to take the word, and

largely involved in the restoration of Human Principles

according to the Will of the Logos.

What is known today under the name of

Freemasonry, it must be confessed, has been the subject of conjecture

examination, perhaps in part by adhering misconduct that have not

always known to behave as true H.: M.: and have entered into

order rather look there for personal gain without any

idea of the role they should play in the world.

Freemasonry is a philanthropic, philosophic and Institution

aimed progressive exercise of beneficence, the

Universal Moral study, the analysis of science and practice

of all virtues, but she was often poorly served by the

members discussed their selfish personal interests and well established

divisions that are wo Too familiar!

However, it would be unfair not to discriminate an Order

He has only played a great role in history but has

relieved and produced so much misery to the Cause of Humanity

elements, whose value would be obvious quote that has helped

safeguard the human species.

There are two kinds of explanations to do: the first for the
profane world and the second for the same H.: M:.

The general public usually feels some difficulty when
is esoteric, occult or initiation and "Masonry"

immediately sees unspeakable magic, because the people,
blind fanaticism, immediately involves secret association

with Freemasonry, and this, for many people, it is neither more nor less than the
source of heinous crimes and infamous practices witchcraft.

It is time for that to change in our century intelligentsia,

far from certain times I prefer not to remember ...
Out of dogmatism does not imply precisely something
antireligious Mason does not mean atheist, but individual who believes
something more vast, is a being who seeks you study and not to limit their
belief to a narrow conception without philosophical principles, is a
investigates subject of spiritual development in order to
Realizing the Royal Lights to become more useful to his brothers
without consideration of caste or confessions humans.
Fight with all the energy that has characterized our
Big Brothers of old, our Venerable Masters and
Illustrious Protector.
It is precisely to act in this way that invited all the
H.: M.:
The Masonic Order is divided slowly through
century, due to the successive formation of new rituals, however,
what matters the way to honor the Grand Architect of the Universe,
because despite the difference in rituals, we remain equally
H.: M.: and lovers of Truth.
I have eaten swallows' nests, favorite Chinese dish, I have
liked the Mechoui Saudi, I have found very good taste in
cuckoo North Africa; still taste the Indian cheese
Central America and have lunch with corn arepas Venezuela.
All these people had a different nutritional habits. So
Masonic same food can be assimilated by the spirit in
form of Scottish Rite, Rite French or Misraïm, etc..

It is necessary in order to understand that no irregular Masons
they belong to the Rite of Memphis, be part dela Institution
Swedenborg or the York Rite is always be part of that Great
Family anyway is organized by a Steering
Superior Esoteric Mandate. It is to this that the World Council
should return all Lodges who have failed not only their
with him, but even "cut" also the sacred bond of
Shrines.
Finally, remember that certain symbolic journey featured a
banner with the names of four famous philosophers Solon
Socrates, Lycurgus and Pythagoras, and instead of getting lost in a liturgy
devalued by misunderstanding, restablescámonos at work
to rebuild the Temple of universal dimensions.
Recall our duty and our first under
Institution: tolerance. How can we stay in sectarian
our Lodges, in our rites or even our entire Order? This is
necessary that our work exceeds these limits

Freemasonry, we are the first to show our entire
liberality coming to the aid of anyone, no matter their condition,
no matter if it is the same Lodge Masons, of the same rite,
or even complete strangers to Freemasonry, but how can we
try this superiority with which we do enforce our
Started title?

If we open our eyes to the public forgetting the discredit
fleet often about our famous fraternal institution, giving a
little value to those who carry the noble title of H:. M:.
I will have carried this Congress our stone in the foundation necessary
symbolic of the first to build temples under columns
tolerance and peace.

CHAPTER

PREHISTORIC MASONRY (From its origins to 1641)

Among the serious and tremendous obligations assumed in the
within the G.: Or.: Univ. and to which we all importance, s
located no less easy to fix, once and for all, the origins
our institution, in order to put words to the legends
fantastic to have no initiatory base and open our eyes to
certain documents which simply point the foundation of
the first administrative agencies, as the Masonic spirit
exists on Earth since there were men of upright heart, of
open intelligence and pure consciousness.

Indeed, if we accept the traditional date of 1641 as the
beginning of Masonic activities in the world, equivalent to
say that before the seventeenth century there was no noble aspirations of virtue,
morality, tolerance and what would be most important, there was no
INITIATED. That is of course unacceptable.

If 1641 is the earliest date from which part of the story
Freemasonry and that you were able to find searching in files
historical, masonic, church or other, one must admit that

was a prior masonic spirit to this date, hence a Prehistoric Masonry.

This prehistoric Masonry some trace back to the time of Adam, which is not out of place as could be tempted to believe it.

Let us explain:

Prehistoric Initiation teaches us that the union of two races human (race and race AD AM) even in the state almost animal, gave birth to the race of AD-AM or Adam was the first to have an awareness and understanding truly human, which is to say that was the first race was held on Masonic ideal as regards the improvement and improvement of the individual.

This course s very concerning and we Initiation Tradition provides other more acceptable or more certain origins.

-
21

Page 11

For that we need to open a parenthesis in order to a slightly more detailed foray into prehistoric Initiation.

Originally, when the man just out of animality began **performing**

2

the world around him, employed a vocabulary primitive that took the cries of different animals between which lived: bison, elephant, goat, etc.. These onomatopoeic that were the basis of human language are: AG or OG, AD, AM, AN, AF, AW, AR, AB and AS. One syllable did not originate in the cries of animals, was the syllable Al degenerated later EL or HEL. This word was sacred to these men, for represented to them the Divine. So these nine screams HEL syllable animals are the origin of Western language and private investment and deformations formed the roots of all languages of mankind.

It is known that in prehistory syllabic investment Western words always indicated an orientation.

The

construction, phonics, word or name replaced and in the blink of an eye an entire relationship, a whole long dissertation on a prehistoric object, geographical, sociological, etc ... These mothers gave ten syllables but since nine inversions A syllable AL, was always preserved, respected and isolated religiously for every language, never suffered investment. The nine investments were GA or GO, DA, MA, NA, FA, WA, RA, BA and SA. However, we must not confuse the investment or

displacement of the syllables of a name to the particular investment one syllable. This is very important as the investment or displacement of the syllables of a name does not indicate a Orientalization a dissent, disruption or war separation between two points of alliance, whereas two investment letters composing a syllable indicates separation, social discrepancy, war, disunity between two centers, complete separateness of Orientalization and moreover the abandonment of Western traditions.

Take for example the word or G'HEL OG'HEL-AN-AN.

The reference to the name of AN-G'HEL a portion of G'HEL-AN migrated eastward, indicating that this portion leaves the parental home for reasons caused by cataclysms or spirit conquest, but not as a result of social discrepancy or internecine war. Also the ancestral name, patronymic

2

Contents, in the esoteric sense is the sense of understanding, of expansion awareness

-
22

Page 12

was not changed in the composition of syllables is the order of the syllables of the name that was only reversed. The AN-G'HEL They migrated to the East were faithful to the traditions Western, the cult of HEL, the ancestral memories. They are those who returned to the West under the name of Angle, England (English) with centers AL-AM-AN-DA (German), GO-RA-MA-NA (German), GRAN-G'HEL (francs), BUR-G'JEL-AN-DA (Burgos) etc ... It is they who enrumbaron to historians race "gaelle" when gave birth in the East (Ananké theory). This parenthesis is necessary to understand what will follow about the origins of Freemasonry and is also valuable guide for interpret a part of the Bible.

Indeed, apparently, the Bible appears entirely reserved to the history of Jewish-Hebrew-israelito association, but their exegesis, ie, the study of the interpretation of their books, their symbols, parables and even their totems, undeniably reveals a compilation of old western memorabilia. Genesis called also the **creation of the world**, is a Western work preserved by gaelle, then by Celts

3

3

The story of creation (Genesis), which taken at face value would smile any school of our days, hidden deep symbolic meaning that is decrypted with

keys. These keys are: 1 ° in the Egyptian symbolism 2nd in all religions of the ancient cycle, 3 ° in the synthesis of the doctrine of BEGINNING, as results from the comparison of esoteric teaching from Vedic India to Initiates Christians of the first centuries. The Egyptian priests, Greek authors tell us, had three ways to express their thoughts. The first was clear and simple, the second symbolic and figurative and the third sacred hieroglyphic. The same word took at their convenience, own sense, figurative or transcendent.

In ancient sciences and theogonic

cosmogony, the Egyptian priests always used the third way. Their hieroglyphs and corresponding time three different ways, of which the latter two not could be understood without key. This way of writing enigmatic and concentrated, is based on a fundamental tenet of the doctrine of Hermes, whereby one law governing the natural world, the human world and the divine world. This language, in a concise prodigious, unintelligible to the layman, was a singular eloquence to the adept, as through a single sign evoked the principles, causes and effects of Radiate divinity of nature. Thanks to this medium of expression, the adept embraced the three worlds with a single glance. There is no doubt that Genesis was written in hieroglyphics Egyptians three senses. After the Babylonian captivity, in the time of Solomon, and Genesis resulted in Phoenician characters, when Ezra wrote it in Aramaic characters-Chaldeans, the Jewish priesthood did not handle imperfectly without those keys and finally came the Greek translators of the Bible, which had but a faint idea of the meaning esoteric texts. San Jerónimo despite their serious intentions and his great spirit, when did after the Latin translation of the Hebrew text, he could not penetrate to the meaning primitive text and even if he had, would quiet. However, he had news this confused when he declared: "The most difficult and darkest of the sacred books, Genesis, contains many secrets as words and every word conceals many! ... "So when Genesis we read in our current translation does not extract from him more than a sense and lower primary ...

Page 13

In the Edenic times, Genesis (the tree of knowledge of good and evil) was an Initiatory Western science encyclopedia. Lost and destroyed many times, was rebuilt painfully in uncertain fragments, Southern by the Celts, the Sa. Earthly cataclysms that shook the West (Sinking of Atlantis, etc..), Also devastated the Western society most of which migrated eastward Leading the Sciences of the tree later fell into the empiricism, in sorcery, magic, mythology, etc., etc.. All knowledge Chaldeans, Egyptians, Indians, Chinese, etc.., were remnants of Western sciences who died in turn with expiry of the importers. Some priests of the Celts South had been preserved during the course of their wanderings in the Ta (Africa), much

Edenic of science, but the diluvian periods that surprised, they spread the lot.

Some of these priesthoods was proposed more stubbornly than others rebuild the Edenic documents buried in the caves located on high mountains to preserve the subsidence.

This priesthood was named after MA-HEL .. MA-SA-SA-I (HEL-I) MO-I-SA ... MOISE (MA water). The word Moses means: race of HEL-SA collected during water (the flood). That is why legend concerning Moses boy is **abandoned** him

on the water by his mother and picked up by an Egyptian princess.

The Legend of Mount Sinai (SA-NA-HEL) is a reminder of the Mosaic initiatory missions seeking documents about the points Highlights escaped flooding.

The MA-SA-I had come to rebuild some remains of Western initiatic science combined under the name G'HEL-NA-SA ... G'HE-NA-SA .. Genesis is the book of the Celts South, the Sa, blends, mestizaje, with NA (black). For the Sa, to escape the domination of the new African elements, grouped important centers after the flood, and to resist these people who were hostile to the West, had resigned to enter alliances, pairings, the slaves intermarried in part ... except, however, in their Priesthoods.

These alliances contracted primarily with Hebrew elements (HEL-AB-RA) and Egyptians, were the beginning of the weakening of Western blood of Sa. And there came a day when they were threatened extermination by mestizos who wanted their own turn, take mastering Israel groups.

-
24

Page 14

To discover rebellion attempts to thwart espionage, the MA-SA priesthoods were formed in small groups that met clandestinely.

This was the origin of secret caste MA-SA.

The MA-SA priesthoods had retained the worship of Western traditions, worship Hel, who taught the Hebrews. This is why the great Hebrew deity named after HEL-AM ... Elohim ... ie: the soul of Hel. Elohim was an invocation superior to Yahweh

4

5
The MA-SA, but gathered the Hebrews hated the cult Snake totem and totem **Calf** (the Serpent of brass, Golden Calf). His religious symbol was the Tau and his totem was symbolized by a bull's horns and a hawk part dela

another. That's what Moses appears in the Hebrew images with art of hair arranged in the form of two horns.

The MA-SA-SA or HEL, mysterious partners clans had composed a series of conventional gestures, words and signs known only to them, to recognize and avoid the treacheries and surprises of false brethren MA-SA.

The Serpent, the symbol of East trophy hung on hatred on Triangle North of great ancestors, to which was attached the Tau, was the secret symbol, a symbol of recognition of new breeds MA-SA, in its mysterious association. But gradually the MA-SA priests were scattered in the East and its symbol was no longer known but some breeds too impotent to maintain Western initiatory authority of Moses' time.

Later, chased by white groups Assyrian kings, tried to restore the worship of the MA-SA and rebuild their initiation secret formulas. They met under the direction of a priest who took the eponymous name AR-AM, ie meat of AR in IRAN. But the AR-AM ... Iram, they knew all Western traditions.

One of their leaders, for **the door of the North** (ie secret teachings of Colleges Northern or Western), was killed at the gates of the **East for a false brother** ...

Later, back in white associations slow immigration from Asia to the West, and composed mostly

4

Elohim and **Elohim** is the plural of **AELO** name given to the Supreme Being by Hebrews and Chaldeans, which derives from the root **AEL**, indicating elevation, strength and expansive power, and that means God in the universal sense. Hua, ie EL, is in Hebrew, Chaldean, Syriac, Ethiopic and Arabic, one of the names sacred divinity.

25

Page 15

professional association of (workers, carpenters, weavers, architects, etc..) sought to revive the science of A-SA and Iran in times of Christian tyranny. But the old symbols of the time MA-SA Iram and time were no longer included.

The Northern Triangle (symbol for the Pyramids first MA-SA) was mistaken for a corner by these new initiations.

The South Tau (T) was confused with a metal ruler. And the snake hung as a trophy on the triangle North was confused with a plumb!.

After these associations, all these attributes, whose origin and symbolic significance were unknown to them, but could not be

caste-related instruments that were architects perhaps powerful political groups in ancient times. Otherwise the Mason word itself indicates corruption MA-SA term.

This is how the Eastern Snake triumphant in its power, symbolized by the snake biting its tail, and whose circle broken tiles priesthoods, becomes a benevolent thread Lead!.

This is how the Tau, Tau ancient Horus and Anubis Osiris, Tau in this rough and rugged cast iron serving in occasions to bring down spies and false brethren coming to enter the secret temples, became a placid Cooper hammer!.

And confusion confusion, Snake plumb, and Tau cooper hammer is usually written as the history of all social institutions, the political and religious humanity.

If these sources are not always historical authenticity from profane angle must nevertheless be accepted by the Masons, rests upon them as Initiation Tradition.

However, for various reasons it seems that the time of Solomon (1020-962 BC) essential date in the evolution of our institution.

Indeed, even assuming that there was no construction under Solomon Temple and not everything that has been brought into the symbolic legend of our Institution, the etymology of the name alone reveals to Solomon Initiates critical data elements and provides unequivocal. Solomon is an eponym that just as Eulises, Achilles or Orpheus, not only represents a character but also

-
26

Page 16

caste, sect, race or age. So the name of Solomon consists of three basic syllables: SOL-OM-ON.

On one side we have the SOL syllable representing the sun, ie the positive pole, science, objectivity, the West and the column J. De other hand we have the MON syllable in all Semitic languages and Saxon means the moon, hence the negative pole, religion, mysticism, subjectivity, the East and column B. These two syllables with its meaning, its polarity and its place in the word indicate well two schools of thought that exist in the world and its serving essential presence of bases, of columns and supports a creating lift Temple to God. Such is the meaning of the central syllable OM (AUM) mantra greeting the divinity. The deep and important symbolism of the name of Solomon not

it could be abandoned with impunity, it would not hurt to follow insist on its importance.

At the time of Solomon was not the required conditions only for the construction of a material temple but also and especially for lifting a much larger sanctuary:

Temple of Virtue and Wisdom.

Thus, although the institution dates back to the loftiest antiquity, and even pre-history, first known manifestation was felt in the time of Solomon the son of David, in the construction of the famous temple in Jerusalem that was entrusted to a team of builders-architects who took the eponymous name Iram. Needless to say once and for all that Hiram or Iram, the character that the Bible tells us was but a worker, a teacher smelter, indeed "very skillful in all works of brass" without certainly at the head of a team of goldsmiths, locksmiths and blacksmiths, but not the "Grand Master" who speaks of the traditional legend.

Returning to the above, the priests of the Jewish people, were in place at the time of MA-SA-HEL or Moses, retained jealously guard their **purity of blood** or white and Western racism as we would say today, the proof lies in the fact that the priesthood was restricted to one breed: the tribe of Levi

5

Ultimately, for preserved from the threat of extinction, they were forced to become secretive groups that gave birth therefore the Order of the Essenes.

This Order played a major role in the story: it is which occurred Freemasonry one of its great teachers: Jesus, of whom we shall speak later.

Brotherhood of the Essenes was not meeting started dealing with trivial matters, practiced severe moral, leading an exemplary life and always trying to establish the balance. They lived in communities, all members worked for the common treasury belonging to the Order and each had the right to worship his idea ... which did not prevent them practice Essenism

6

His pass was greeting: "**Peace be with you**" ... (Pax Vostrum). A category remained celibate and devoted to

higher degrees of initiation, but the other married. Must adding that the unions were not lightly undertaken, since in this act had an esoteric significance. A three-year trial was required before it can reach the first grade. Naturally it is necessary to add that the faster evolution Essenes were vegetarian, ate nothing and drank flavored water from sources ...

Thus had numerous rules to avoid fanaticism East, having its headquarters in Jerusalem

8

But ... also had institutes in Alexandria and Heliopolis, but with a view to recruiting, as they were but to lesser degrees Schools ... We need to repeat that Jesus was an Essene, as we think this is definitely settled in the spirit of all H.: M.: Séanos, however, allowed to mention some very important facts. The teaching of Christ was similar and consecutive to the Initiatory Colleges teaching. A very beautiful proof of this There is a scroll found in Alexandria

Multiple purifications: body by frequent bathing daily, and spirit meditations and prayers. Its rules also ordered them to use white robes in an intellectual sphere, exercise hospitality spirit of more democratic and live off the produce of the land to the exclusion of any trade or industry.

With regard to wine, everyone knows that alcohol is banished from the Initiates. All former or current ceremony where drinks are served in this genre Iniciático immediately betrays little value in such religion, group or fraternity ...

Alexandria, and those few years after the death of the Lord

10

This correspondence was addressed to the Essene Brotherhood of Egypt to treat a related point with the rumors about Jesus of Nazareth.

In this Essene manuscript, described the High Dignitary Jesus' childhood devoted to this mission from its lowest age (Insiders know the reason for this), all the details are there content about your education in the Order, evolution and life retirement and study. After leaving the College when Iniciático reached the Masters, the consecration of the last test (the water) was given by John the Baptist.

The Venerable Order adds that Jesus did not act after more that within the Essene line instructions and had the permission for all acts performed.

This letter from Elder of the Essenes is very important because she recounts not only that Jesus was a Brother of the Order, but also "Dear brother of our community." Later

Superior adds: "It was an Enlightened Master and an expert in the healing art as they are always our superiors ... "The Great Therapist also knew that Jesus, Chosen of the Almighty, was sent by Him to teach during his lifetime the Kingdom of Heaven. " The Essenes of Alexandria soon became convinced that the Divine Master was a member of the Order, as it followed the rules using the signs of recognition and that as High

Originally did not come by any sect, although certain virtues practiced and certain ways of teaching that left no doubt when also recognized the pass word: **Peace be with you** (Indicative of Colleges North).

Recognition by the same Superior that Jesus did not need for authorization to act as he did, is also very important, and the fact that the Master

is fully compliant with the rule. Namely

10

According to the esoteric doctrine, Jesus lived roughly 40 years after the crucifixion. You down from the cross after 6 or 7 hours, is scientifically found that the Christ had not died, as executed in the same conditions gave the last gasp 3, 4 or 5 days later. Transported to place insurance magnetized, curing, etc., had to devote to teaching disciples Order only. This theory is defended by the most eminent occultists some historians, and serious researchers, including Prof. Ernest Bosc.

11

A Nazario (coming Nazareen word), is a traveler therapist. Jesus

only prefer independent living (he nazareanizó) but the Initiates know their **conduct**, had accepted the mission and since then should work isolated not to drag the Order to this end that He had accepted Him alone.

very clear to those familiar with the hierarchical process and Mechanism of Initiation.

As for Jesus, we need to do also very important clarification, and perhaps distasteful to many, as regard to spelling.
Christian scholars do not ignore the need to write Jhesu with "H" (mother of command letter is also in the Monograms):

But it is also necessary to delete the S, for otherwise it would link to a vulgar Divine Nazarene sect.

Indeed, if we analyze this name in the light of Initiation found that prehistoric Celts migrated southward elements (Sa) forming the HEL-SA centers (started taking an eponym) later were a village of OG-SA-HEL (HEL-the children of SA) the J'HEL ... JHE-SA-SA ... Jhesu.

After the Essenes, and apart from the philosophical schools of Greece (Pythagoras, Socrates, etc ...) any secret institution important first appeared to the Middle Ages and it was in the time of the Crusades, when the Knights which emerged Temple, which is described in the supplementary part of this book. It is almost certain that the Templars received its name from the Introduction to Oriental which voluntarily joined wanting rebuild the Temple spiritual (invisible) after receiving indications from the builders of the Temple of Solomon (visible in Jerusalem)

12

As often happens in such cases, the foundation is due to a very small number of peers of the same character ideal. Under Beaudoin, King of Jerusalem, two French knights Hugo Payns or Payens and Geoffroy Saint-Omer arrived in the Holy Land

routes that led to Jerusalem dangerous gorges. This protection seemed possible joining other knights and so convinced seven comrades and plan for their risky made them take an oath of mutual fidelity.

It is naturally difficult to attribute all the qualities as important that rendered his order. However it seems very likely some of them very distinguished spirits were aware Christian Hermeticism, architecture and traditions of initiatory groups **Companions**. They soon were thickened their ranks by knights and chaplains of different nations, men holders teachings and quite rich symbolism, as well as monks builders started.

A first lesson is offered to us already: the founders were
9. We know the preference of the Pythagoreans and Kabbalists by Æneid, located in celtismo the bardismo and Fathers of the Church, which also met a symbolic teaching continuation of paganism.

We have no need to dwell on the Masons importance should be given to its cult San Juan, and Johannism doctrine which has the reputation of having professed. We also think that it is useless to cite the details too known, prompting the Pope on one side and the other royals, to persecute and suppress the Order of the Temple: confiscate their property and fear of their influence, were the major mobile. The bloody they suffered persecution, forced the Templars to expatriate or reenter other religious orders. However, some survivors groups deserve mentioned as the Templars themselves transformed into Knights of Christ in Portugal

13

One or the other of chivalry created neo-Templars of who said that in the eighteenth allied with Freemasonry where admitted with high grades, they retain the garments and keeping with intentions of revenge ... hatred against evil King and weak Pope, cause misery.

However, the survival of the Templars is fully on stream in Freemasonry; are just some general symbols and rituals.

13

Although it was a continuation of the Templars, the initiatory character of this order was void, yet was forgotten awareness work with feeling universal. It was rebuild the Order, in its religious line and nothing else.

-
31

Most of the medieval scholars doubt the continuation of the Order in Masonic rites and especially the value documents that retain on file.

It is undeniable that certain teachings left the Templars refugees, which makes it possible supporters were grouped in secret societies and whose followers soon established rites where memories of the famous Cavalry remained as base. But peer associations merge in is one thing, and introduce Templar symbols and teachings is another.

In a word the affiliation of H.: M.: with the Templars is completely relative thing; refuse to admit transmission Regular Freemasonry Temple. However, certain rituals have received a portion of the Initiation heritage, but it is necessary to take the origins of Freemasonry long before the militia of Christ.

Naturally this is not to deny the existence of certain Knights in current time, since the problem of the Order of the Temple is no more than a reference in the Universal Freemasonry.

In addition to the Order of the Templars is the Fraternity's important throughout the Middle Ages, most other sects or associations or initiation and occult least equally saw the light before traditional date of 1641.

First come the professional corporations (Builders, weavers, masons, etc ...) with the intention of maintain their professional secrets and prerogatives formed in compact groups and almost impenetrable, whose learning demanded many years of perseverance and fidelity. For even during the religious revival of the work was not questioned by anyone. Such was the origin of the fellowship.

The branch building cathedrals where the Franc-Operative masonry (masons, builders, architects, etc.). always possessed the highest initiatory tradition, was the only request studies on almost all trades

teachers this

Brotherhood had a traditional and Iniciático Knowing that came from three main sources:

1. Fraternities created by migrants from the East.
- Two. Workers brought to Europe by the Templars, and
- Three. In the past, rich in teaching artisans bisantinos traditional than you might think.

14

Vitruvius in his "Treatise on Architecture" which he dedicated to the emperor Augustus required historical architect not only technical knowledge, but also knowledge in mathematics, natural philosophy, history, music, and astrology!.

-

Thus the Free-Masonry was the camaraderie of the Masters Freemasons cathedrals. This strong partnership was part transmission of traditional hermetic and later introduced geometry and sacred numbers, symbols and rituals of work and sense of tools, to what is called the Blue or Symbolic Masonry.

Also note in passing some sects and rites formed before the official birth of the F.: M.:

In 1135 (!) Was founded in Stockholm SWEDISH RITE comprising Grades nine, the last of the Initiate of San Andrés. Had are also three Honorary Degrees, the last of which was to Reigning Master.

We soon BROTHERS OF THE ROSE CROSS

(German) who founded the Palestine Order in coming year 1188. This Order was amended in 1378 by Christian and Rosencreutz dissolved in 1798.

The STRICT ENFORCEMENT was founded in 1312 by Pedro Aumont, who was known as the Grand Master of the Templar four branches that survived after the dissolution of the Order of the Templars.

In 1482 we find the Platonic Academy in Warsaw founded by Marsileo Ficint.

Anyway, chronologically the last of the major sects hidden, created prior to the formal foundation of Masonry is the RITE OF THE BROTHERS OF JUAN who was inaugurated on 24 June 1535 and aims to be the F.: M.: of contemporary Christianity. Using certain files has been achieved laboriously traced its founding to 1440!.

Regarding F.: M.: Initiation, which is mainly due interest us, comes from regular transmissions Hermetists Renaissance and the eighteenth century, heirs of the guardians of the Patricia primordial tradition, going back one far from the another as we have just seen. Among its founders, no longer spokesmen transmitters but this universal tradition of various hermetic currents: Pythagorean, cabalistic, mitríaca, syncretistic, co-eastern, Christian, etc ...

Thus, from the depths of time, the Brotherhood has emerged Initiation waving here and there spiritual values and giving free rein to the freedoms that are the guarantee of the dignity of man. The Great Family time wisely obeyed the Hierarchy and the Wise Spiritual Instructors who ran the Shrines, and all other cliques or Arcane Schools. In this way, the progress and

peace among men were warranty for this world government Initiates, we should not forget that it was these same Initiates who made the greatness of past ages that were also they who built the most beautiful cathedrals in Europe.

However, it has always been a Fraternity Initiation central power, which has been mixed gradually with systems corporate, religious and philosophical. Transmitting a part of your esotericism retracted whenever alluded to true mysteries delivered but not only started, which very prudence always tried to form a College, but preferred to give the hidden assets to a single element rather than disclose sacred to any individuals teaching.

However, the Supreme Grand Council was always the safeguarded, official secrecy, keeping the VERB, appointing its members, giving impetus to some groups to that, although weak, always burn there on a initiatory fire, and keeping the spirit in the midst of some secret societies, which without being entirely under his authority, yet because of his living influence ...

CHAPTER TWO

HISTORICAL MASONRY (From 1641 to the present)

We do not intend to make a current or history Freemasonry, as can be found in any textbook; spent above the corresponding elementary learner to noted only events that were designed to "protect" autonomy of certain egocentric personalities, or even very often because of lack of knowledge by moving away from the real sources.

Not Initiation have been revealed but some elements, the Gr. Or.: In France at the time of this merger is in serious disrepute. However, it is a fact that has always been at least A representative of the Supreme constantly prepared to address ensure the true tradition to perpetuate that teachings of the Elders.

The Rite Misraïm with ninety degrees (symbolic 1 to 33) philosophical from 34 to 66, Mystics 67 to 77, 78 to hermetic 90) offers a long initiatory asaz scale to delineate categories of individuals, but instead retains a teaching symbolism is very significant because it is about more Ancient Mysteries the other rites. Thus, Freemasonry has been divided gradually into practice different than they have been far from constructive be interested, and even more, these various rites are not all yet.

Naturally the Directorate of Universal Freemasonry has been contingent in the events, and as they constituted new rites slid more and more serious elements and almost bit undesirable, also separating the lodges of the central power.

Apart from the rites which we have given list, it is still necessary add RITE ALEJANDRINO that was specially formed to respect the basics of astronomy education, he has often RITE ISIACO qualified by devotion to the phallus that was practiced there related to the mysteries of Isis. It is not really possible in the limited space of this little book refer to the legend of Horus and whole Osirian mythology.

There is also the AMERICAN RITE with three classes

Initiations: Manual, scientific and philosophical.

No talk of Freemasonry Androgynous (seudomasonería that meets all rites), or the OLD RITE has not had good direction.

This rite, also called martinism, (no I confused with all martinistas societies that emerged at last nineteenth and even the twentieth) has passed in secret while that of the Strict Observance. There is still a limited number of matinistas who are true masters, as the true Rosicrucians, which are currently five in the world (not Speak naturally Grade 18 ° Scottish Rite A:: YA::) And who need not confuse with all members of these associations propaganda, more or less noisy, demanding that the Ancient Egyptian Initiation, and even more, the Tibetan! .. being simply Book publishing companies, supported by membership fees too credulous, who are content with some monographs instructions vaguely occult initiatory degrees offered correspondence and change fund and checks! ... The Rite Freemasonry ZODIAC is a twelve degrees following the evolution of signs: Ram, Bull, Twins, Crab, Lion, Virgin, Scale, Scorpion, Centaur, Goat, Waterboy and Fish.

Other Masonic branches without knowing the preponderance of our current great rites have been working quietly on the improvement of mankind. We can cite:
ACADEMY OF TEACHERS OF SUBLIME
RING LIGHT, the Rite of Gr. Log:: ROYAL YORK
THE FRIENDSHIP OF BERLIN; Rite MAGNETIC ROSE, and the RITE OF ANONYMOUS composed of seventy-two members, all Kabbalists, grouped into three sections of 24 and of which Gr:: M:: is entitled Tajo, and resides in Spain.
There are also: the RITE OF EONS (Zoroastrian system); SIBLINGS Manichaean (professed doctrine of Manes in Italy in the eighteenth century, the ILLUMINATED SIGN, the Rite the INVISIBLE (professing atheism and suicide (!) what is incompatible with Freemasonry), the RITE OF WIZARDS (in Florence), the RITE OF MENATZCHIMS, the PERFECT BEGINNING OF EGYPT (grouped in Lyon), the RITE

PITAGORAS, works with three degrees, the RITE HAITIAN that comprised three degrees at first, but was later modified, the RITE Jesuit who is not exactly known for the Mas.

Univ., But nevertheless has had its influence mainly on RITE OF CHOSEN Coens, we have mentioned in passing.

You will still need to add the MEXICAN NATIONAL RITE works with thirty-three degrees being the last Grand Inspector General of the Order, the Orphic Rite is merely a Free congregation that operates without legal authorization, the RITE SCOTTISH GRINDING five degrees, the latter being secrets divided into three degrees, the RITE YATRICO (eighteenth century) who has only a single degree: Cos (capital of the island of that name, homeland of Hippocrates).

We could even extend the list, without orders or philosophical co-Masonic, but have quoted some rituals to give an idea of the vast enterprise it is today Freemasonry.

From all this it is necessary to draw a lesson: if instead of inaugurate a new rite on each occasion, to which surely no have missed reasons, had attempted a synthesis of centralization forces working for the development of the lodges, we would truly begun rebuilding the Temple.

Surely we are now in possession of materials for this reconstruction, but like many Gr. Log.: have taken a excessive administrative autonomy, it seems that raises a difficulty each overture, the venerable G.. M.. is

have become captains of ships who do not want to respect the international law of maritime navigation

In short, you need to understand once and for all that **there is More: Irregular;** belong to a Rite or another is always to hand Much of this anyway Family is organized by a Senior Management with Esoteric Mandate, as Freemasonry is a secret only as it is teaching, has authority only as it is their esoteric and has autonomy is only as about his administration, but beyond this, there is a mission humanitarian that all Masons know: the practice of good works, the study of universal morality, the analysis of science and the arts, and the practice of all the virtues.

Then then we are no longer limited because the F.. M.. But the Otherwise it all moves that incorporated fulfilling a civilizing mission in the world moral aspect, fraternal, social and humanitarian fully in the universal sense.

Formerly, Freemasonry consists of Initiates, ie by citizens of the world, was the surest guarantee of charity of virtue and free thought. It was a social structure sheltered from persecution, injustice and distress. The right to asylum and relief were their traditions safer. Their rites were neither speculative nor imbued with lyricism but a hieratic character in its broadest sense creator.

The end of the great universal family were actually a supernationalism world, whose citizenship was subject to principles moral and spiritual values, which are also to be cosmic also eternal Persons.

There is concern a definition Freemasonry Today. No one pretends that it is a religion, but some claim it is a political faction! Beware!, Unless we wanted free thought to be a religious sense, or also

we want to make Freemasonry a extrapolitical body. In Actually, we should be the inspiration and safeguard sovereignty office in the greatest human sense. The true Mason as free man who is a citizen of the world, but this does not prevent belonging to race, clan, religion, political party, or nationality of their choice. Moreover, the respect due to the established authority requires this citizen of the world an attitude dignified and cooperative with the established powers and with all individuals.

Do you keep the Masons of today these principles?

Ever We are an example of these qualities that formed the greatness of the prehistoric ages and the strength of the Sanctuaries esoteric old?

We are far from believing!

That is why at this crucial moment in history and coated the authority has given us, we launched a cry of alarm turn, led to the Brethren. MM.:

Masonry, the true Freemasonry, because the spirit universal, which daily anxiety in marasmus and oblivion deformation, calls you to all H.: D.: L.: V.:

By acting on your behalf, do not aspire to usurp any right or improperly attribute to qualities.

Why not admit the Truth? The Fellowship has failed preserve their sacred mission and has deformed his Initiation becomes a simple symbolic legend and a lyricism without results. His intervention in human affairs during the history, were evidenced at the beginning of time high

civilizational and spiritual significance, but soon fell into a morass of lawsuits and discouraging antagonisms.

Their struggles against the monarchy on the one hand and against the papacy on the other, pretending to impose any authoritarian power gives an example of absolute autocracy and excessive violence execrable able to get a whole view.

We must warn our present and serious emergency history, which started to be true we can not associate ourselves with such degradation of Masonic principles, limitations or dark marking the decline that has fallen in the human soul. Here the Because of our intervention and the reasons for our action restoration of the true Masonic spirit.

Prefer not there are grounds that motivated this intervention. If Freemasonry had not abandoned their traditions secular since the eighteenth century as a result of improper "Mass recruitment of so-called English lodges" and if there I could realize sooner he undertook the false path, the Council Superior, that despite all appearances, sailing on the future of its exoteric representation in the world, would not now obliged to restore the true Masonic spirit in its original purity.

Where is the true Masonic spirit of those who exclude members of their lodges, because they belong to their race or their own rites?

How not worry constraints and deformations Masonic spirit, when we see so apocarce moral

complacent and postulates disappear under constant commitments?

Most Masons today have arrogated ostentatious titles symbolic degrees, whose fantastic lyricism leads to the distressing lack of virtue and true dignity: pride, ambition and selfishness are the basic expressions of the great majority of which make Freemasonry a very poor display sacred symbolism of our predecessors, those Initiates the great shrines of antiquity.

We think that Freemasonry has committed enough lyricism to now as its liberal action is indispensable for peace and salvation of mankind, must incarnate again effectively and tangible symbols meaning and essence of their ideals.

Masonry is hidden tie that binds one big family: all those who have realized the freedom of the soul, which They have become knights of the spirit. Masonry must respond to vital human imperatives and must serve

designs of the universal soul, because otherwise it would be a vulgar association idle disguised idealists. We get the exact meaning of the concept of Masonic Initiation and transform into Apostles and gentlemen of universal service, the precise intention of giving free rein to the power and glory of the verb spiritual.

If all true H.: M.:, And those who do not are more than potentially would realize that we are not dealing with a single ideological confusion or a dispute between authoritarian groups, unconditionally would work with us, because in this case they serve no propaganda or group, but to the human species whole and all the designs of the Great Architect of the Universe. This is the spirit on which our virtues are erected and the we want a general mobilization.

CHAPTER THREE SYMBOLISM AND ESOTERISMO

**Over the ocean of life what
would that be the reason
helm, if passion is the driver?**

This part of Freemasonry is no more than that he has suffered alterations. And, of course, well known that the spirit of fraternity and restore consciousness Eternal Word are far from being applied in our current lodges, whereas the individual policy of each rite and its external expressions themselves are show very clearly.

With the same symbolism is observed.

Assuming that you have not completely forgotten the meaning esoteric of each symbol, which is most often the case, we are now forced to settle trivial explanations disconcerting. It is pathetic to note the lack of preparation of our brothers that happen in life as vulgar "Quidams," since the lower Apprentice should be distinguished for his scholarship, in addition to its light and how they act in their circle spirit.

If we stop passing on a part of the definition of Freemasonry says: "site whose members strive to practice all virtues ... "we have amaze to see Bro. M.: drinking, smoking, and swayed by all the passions, and not understood how many banquets become true sessions gluttony and drunkenness! We will see later the significance of these Masonic banquet should be held with the highest

mysticism.

But we return to our point: we do not insist on behavior should reveal the H: M: in everyday life in order to give a example the profane world, but even on a minimum of knowledge to proclaim and demonstrate the superiority of one member of an initiatory society.

The crude stone should be nothing more than a pebble thick abandoned at the entrance of the temple, nor a symbol which just a slight hint is given, it is necessary to work it.

Corresponds to teach the Apprentice Teacher beginning with the elementary symbols, without rooting the Initiation Tradition content to perpetuate this kind of theatrical performance our lodges, is therefore needed Workshops, local true of learning, restarting with fervor and sincerity (Graph I).

The symbols in simpler appearance stored deep truths, a special teaching, a tradition to respect and lessons to be learned.

We see, for example, that the three points well graphics known, occur much more than the basic data is

We teach in small lodges courts. We must know they allude to the open bar: the head and the tips of the compass, the first representing the sun, spiritual source, illuminating and giver of life, and the latter representing the two polarities that exist in the universe. The three points can also aspire to following qualities: expansion - concentration - stability. They are three people who do not drive but God also represent faculties: reason, memory and will, or force, matter and motion, or even action, resistance and work. Moreover, it is the assets, liabilities and the intermediary in terms of thought and action. We know

Naturally they also hide in the eyes of the profane, the triangle, in this regard we note that the Trinósofo is prerogative of the French Rite.

The first side of the triangle is for the Apprentice, is the kingdom mineral (symbol Tub.)

The second side is for the partner, is the plant kingdom (Symbol Sch.)

The third side is for the Master, is the animal kingdom (symbol M: B:.)

It would be obvious comment on the mineral kingdom corresponding to the first grade when the stone is still, in the second grade, generation of the body is very distinct from the "G" Blazing Star, vegetation appears, finally, in the third grade, the

Maestro comes to animate the whole.
This development is related to the famous axiom of occultism:
Know-Want-Dare-Callar. In effect, in the same manner that the three
faces of the pyramid resting on a common base, the axiom rests with:

On the table is registered a reference to Perpetua Amphora: "Offer you already in release (Jah)," currency is Rite derived Serapis. The Cup (the Sacred Glass is the symbol of Aquarius) rests on a significant Sword, as Exodus, Chapter IV, verses 3 and 4, which are explained in detail in the book The initiatory centers by the same author of The Series Great posts. This representation derived from the Chaldean symbolism, explains very well the work of transmutation (snake crawling life to be transformed in stock Heights, in the fresh air where reigns the Eagle), which is very significant as expression of the zodiac sign of Scorpio (the double constellation Reptile-Eagle) is equivalent Kundalini yogis.

All M. M.: must update his Masters three lessons: a

Returning to the triangle, base of the pyramid, we must say that rising to the unit vertex form applied to number four occult axiom just quoted, thus symbolizing the common work of the three base grades for ONE Fin, an ideal, a duty.

The triangle also features the four elements listed as follows:

very easily retained by the first four digits in German: ein, zwey, drey, fri.

EIN: always forward, ebb and flow, evolution, ie the air.

ZWEY: (in Hun, zweig) means seed, fertility, designates the Earth and producing fertile mother.

FRI: The fire, according to Plutarch, was to be the last revealed.

If we analyze the trinities, be too numerous, that is why simply cite the Trimurti Hindu Theology:

SHIVA BRAHMA-VISHMU-which is respectively Creation, Preservation and Destruction, ie the earth, water and fire, all concurring elements air element that the Yoga is the highest and leads to the ether, then to the mental universe, and finally to the Absolute elements.

But it may be necessary to give a brief explanation:

Seven centers are the commands of the human machine: the endocrine glands are visible levers; plexus (called chakras in Sanskrit) are his witnesses in the astral. Naturally know that the astral body interpenetrates the physical body,

Consequently, seven fluidic centers (the astral body) also manifest in the flesh vehicle. A subtle force, a vital power, magnetic current, called kundalini in Sanskrit, is latent in each individual state, and certain exercises rhythmic breathing with the help of special positions (Asanas), humans get to put in current action special (Sukshma) that heat the central canal, and kundalini rising in center of the body illuminates the different centers (chakras) to the point transmute the physical forces in spiritual power. Often symbolized with a serpent coiled kundalini on itself and rising as a result of certain postures body, mental concentration and diverse knowledge of the mechanism, so that the system is valid. At all times and in all religions, has been aware of this force that is necessary develop, and all practices, whether individual (yoga: word Sanskrit which means union - Communion - Fusion, naturally the sense of personal self with the Universal Consciousness), or whether collective (mass, environment created by various sessions, etc..) consecrate the function of this inner strength that rises to over centers.

Cane seven knots of Chinese scholars, the Bacchic thyrsus (Rod terminated pineapple representing **inner fire**), cane Pythagorean, the staff of the Templars, the arch bishop of Catholic bishops, etc ... are other symbolic expressions of kundalini, regenerative power of fire in action, power human electromagnetic forces transmuting individual looking for its improvement.

In this search for balance between the microcosm and the macrocosm (Yoga), are characterized three states Divinity (Brahma the creator, Vishnu the sustainer and Shiva the

Yoga helps science still in its practices refinement, with prayers (mantras), incantations, articulating at certain times and in certain tones harmonic modulations, as one ritual. All these words of the Yogi are considered sacred, the most current is AUM (as in many early Mantras; **AUM MANI PADME HUM** ...) We have seen in Chapter I the two currents: positive - negative and solar-lunar, joined by the word AUM (OM often written!) in the name of Solomon (SOL-OM-MON: Sol-AUM-moon), which means the active force of science and passive core philosophy, gathered by the will of the being who seeks

by this spell (the mantra) rise above the customary conditions. In terms Mas. We say that the union of the two columns (J.: YB.) work directed by Lodge (Master), comes to support the Universal Temple to which all aspire M.: M:. This also includes the meaning of colors (Red and white) on the banner of the Templars: red cross on malt white background, ie **wisdom and love for the Regeneration Universal**, also being the symbols of the two operations Alchemy Capital: Solve-coagulated.

Therefore, the triangle supported by columns is the Divine image; thirteen rays emerge from there: four on each side (Quaternary of elements containing ternary proceeding at its apex the sublime denoting unity ray emanating from trilogismo), whose projection from star to star allowed 3,060,000 calculate the hidden worlds.

The eye in the center of the traditional triangle, demand more explanation that "the presence of God everywhere." The two eyes face are the two foci of the ellipse, which is itself the eye one of the supreme head, this unique three halos eye must be placed in a triangle. The two eyes of the flesh lack importance next to the eye of the spirit, which requires no duplicitous as face. This eye of Shiva (agna-chakra), the outgrowth of the pituitary, is that of clairvoyance, the Atlanteans gland increased in such so that gave birth to the legend of the Cyclops.

For all these legendary symbols of the study suggest Zohar (the holy book in which are the main legends copiladas Masonic) tradition. Reviews of Rabbi Ben Schimeon Jochai, are numerous regarding Siphra-Dzeniutha (Theogony of the Zohar)

Here we touch the delicate problem of Scottishness in his error Supreme Council 33: In Lodge no real grade 33, but only in the honorific sense, there are 32 living Buddhas (HUTULKUS), who are the representatives of the 32 pathways Wisdom, consisting of ten and twenty Sefiros unions form the Tree of Kabbalah.

The Sefiros are emanations, not divine hypostasis. These are the foundation of the world of divine ideas are the ideas for it which God's thought is creative principle, ten attributes through which the G.: A.: D.: U.: It reveals a part of its essence inaccessible.

The divine science of Kabbalah teaches that the species corresponds to Archetype is expressed as CORONA - WISDOM - SOVEREIGN PRUDENCE (the two columns on the frontispiece), and likewise the relationships that exist only between Sefiros are:

Ehyeh (I Am or IOD)

JEHOVAH

(Es or IAH)

ELOHIM

(Swearing, oath or IOHA)

EL.I.

(Powerful)

SADAY (enough by itself).

ELOHA (path of glory)

STARS (armies of angels)

ELOHIM HOSTS (command armies).

ELOHIM ELCHAI (living God), (The primary route).

ADONAY, Lord (the pathway called kingdom).

You need to define the system of Sefiros resting on a aritmológico mechanism: "The abstraction of 2 in 12 resulting in 10 "; are general ideas, which in a philosophical expression of Divine Manifestation, should be arranged on a dodecagon, but which are expressible by only 10, because the absence of 2 other ways deprives intellectual representation, since a of them is the idea of First Cause and the other of Creation which in turn shows the existence inconceivable.

The Sefiros therefore listed in ten, in the care of ENSOPH (ie AIN-SOPH, the Unknowable) and is classified as follows:

1) KETHER (the supreme crown)

2) Chochmah (supreme wisdom)

-

- 6) Tiphereth (Beauty)
- 7) nizah (victory)
- 8) HOD (Glory)
- 9) Yesod (foundation)
- 10) Malkuth (the kingdom)

We shall not dwell more on the subject of Sefiros, which must be known of all M: M:. Moreover, as this book goes Mas to all. in general, those who have not reached Chapter Degrees may study more thoroughly the time Science of Kabbalah (particularly from Grade 15).

Let us open a parenthesis to say that St. Jerome (who knew the Gnosis and Kabbalah), intentionally introduced interpolations in the Bible, which lay hidden from the eyes of the esoteric teaching. St. Jerome's translation, called the Vulgate, was poured from Hebrew and ranked Version 70, which would be more fairly of the 72 Rabbis. Dispense with comments to clarify these 72 David verses (most of which are not in the Bible!), and relate each to a Genio ... These forces cosmic, called Higher Intelligences, have been personified by this fact, with a respective number, and every sacred verse corresponds a personification established by the Cabbala, which removed as follows:

The Hebrew text of verses 19, 20 and 21 of Chapter XIV of Exodus, is composed of 72 Hebrew letters each. Taking each case these three esoteric verses expressed in three lines, is follows the following rule: take the first letter of the 19 ° and 20 ° starting from the left, then the first letter of the 20th starting from the right. These first three letters indicate the attribute of genius. Continuing with the same method until the end, get the 72 attributes of the divine virtues. The 72 Names of God rests, first, on a vine (GEFEN PORIACH: the fruiting vine), because this tree with that agencies adorned temple multiplies easily. (The Scriptures especially mentioning him tied to the people of Israel).

The olive tree is also represented, because it symbolizes the planets (in Genesis it says that the G:.. A:.. D:.. U:.. established therein their celestial candleholders, so the dove brought Noah a small olive branch), and is known to us all the stars advertised.

The palm, the first letter of God's name: Yod, is the

The sign of the Water Bearer, symbolizing Ganimedo - science - is the
sign of the Son of Man, who tells us in Matthew chapter

The first river of Paradise (Genesis, chapter II) is PHISON
The vine symbolizes the second letter of the name of God: HE. This
letter, so that its value is HE = 5 can not be added to
any other but herself to add 10 ($5 + 5 = 10$) that number
perfect which is known to represent the Divine and therefore YOD
It is the tenth letter of the Hebrew alphabet, in the same way that the vine

represents the side of the sign of the Lion, for LEON means light
God, and, therefore, Our Lord Jesus Christ should be the victor of LEON
Tribe of Judah (Gen IV).

The second river of Paradise is GIHON

The olive tree represents the third letter, ie VAU, which means
a pin, like pin the sacred Temple. This is the symbol
Light likeness of planets, created to show the
changes and alterations can be made in the sublunary world of
Generation (G:). The representation of the sign is Taurus the bull,

that strength, symbolizes nourishment, as Solomon says in the Chapter XIV, verse 4 of Proverbs.

The third river is Tigris Paradise (subtle and light).

The apple is the symbol of love and represents the fourth letter the Divine Name.

The fourth river is called Paradise PHERAT (fruiting).

To be precise from the point of view of the Kabbalah, in order to help memory to lay foundation of study points crucial, it is necessary to mention here the early teachings of Arbatel

25

In Isajoge in the third septenary, see aphorism XVI that is very interesting, but before we quote the passage XV aphorism: "Strive to understand everything you undertake with the help of God "(repeated here Arbatel their first lessons: DEO DUCE, Degree Initiation and FERRO COMMITTEE second grade). The Magician who knows the Laws of Nature, has such power over beings, that every act of thought necessarily takes place; but on the other hand, the great danger of this power is evident in the Famous Key: "Any failure, any negligence can be fatal."

APHORISM XVI of Magic arbatel. Seven are own offices or powers of the spirits whom God has entrusted the machine direction of the world. Its visible celestial bodies are: Aratron, BETHOR, Phaleg, OCH, Hagith, OPHIEL,

He ruled until 430, Phaleg of 430-920, ruled Och

Ophiel cycle that will last until 2390.

Arbatel is the Revealer of Truth, the Producer of the Mysteries, he has Quaternary materialized Law of God, but the revelation is very hidden expression for the ignorant, insidious and deceptive as the Demons. Its name symbolizes, also, the angel who takes care of the matter, the Prince of the four cardinal points. This is the Access to Knowledge (The Magic Arbatel).

Everything is Magic, and it is eternal. God gave it to Abraham, came to Moses and Jesus spoke of it to his disciples, and all the Sons of God have known.

This is the Ancient Pneumatics. This knowledge is contained in 9

volumes (which are divided into three ternary, each having three qualities), with Septenary seven aphorisms. The first volume is ISAJOGE (Book of Laws

This partly explains the symbolism of the seven steps located in the East in some rituals. Other rites only have five steps to be crossed to reach the chair of the Venerable Master. (These are the five steps according to the colors Planetary: Saturn, Jupiter, Mars, Venus and Mercury. The Sun and the Moon are represented by the two pillars placed at the entrance Temple).

It is well known the role of the planetary system Freemasonry, because even in your calendar system used different from the profane world, on the basis, whether cosmic or calculations, an astronomical calendar.

The Gr. Log.: England has adopted the computation of the Age Christ. Scottish, Irish, American, French, Belgian,

Dutch and German, are based on the Calendar of Light. (El Mizraim rite in four years has increased the computation). The Knights of the Sun (28th grade), and was not allowed any computing year by 7 zeroes. For H.: M.: England, Scotland, Ireland and the United States, the first of January of the year 5844 Luz corresponds to the first of January 1844. The French rite ago Masonic year starting on March. **Chance is an unknown progression and

**Chance and forming the future time,

future of a destination**

Regardless of all the explanations about astrology, which is the basic study of Freemasonry, say, however, two words about the symbolism of the Zodiac.

Although not quite accept the current definition of F historians. M: "Fusion of Judaism and Kabbalah Neoplatonic Christianity ", Freemasonry must teach kabbalah and as magic, astrology, etc.. An esoteric institution such as our Order can not ignore the slightest knowledge human, and especially when it is a matter typically Initiation.

The symbolism of the Zodiac require many volumes, but Briefly we can say that this band of 17 degrees in the sky rests on the ecliptic, which has an inclination of 23 ½ degrees on the celestial Ecuador, and is divided into 12 equal parts, Signs called, of 30 degrees each. Zodiac signs are symbolic representations of the 12 major constellations, which apparently runs the sun in its movement translational

26

The sol transits apparently through signs, at a rate of degree or so per day, as follows:

In the Lamb, March 21 to April 20

27

In del Toro, April 21 to May 20

26

The difference between astronomy and astrology lies in the use of the system heliocentric or geocentric, respectively. Knowing that the sun occupies the center of this universe, calculations, however, are easier geocentrically considered, ie, pretending that the earth was at the center and the sun and all its planetary courtship revolved around our globe. With Based on this working hypothesis the ancients wrote their works started, which has served to say that the old "saw" the earth as the center of Universe!.

27

We know that the first of January is the beginning of the secular year. Calendar Masonic begins during an astronomical phenomenon in Equinox spring, March 21, sometimes 20, depending on the year. This event has deeper meaning, and especially more scientific, because the length of the night has exactly the same number of hours a day, this is the real beginning of the year.

The sun and ends at $365 \frac{1}{4}$ days, the heavenly 360 degree, returning to the starting point of the trail sign to fulfill a new annual cycle.

Similarly, all the planets circulating about this band, no only at different latitudes, but at different speeds,

So if the Moon spends 28 days to fulfill its route, Mercury delay 88 days to travel the zodiac and spends 225 Venus, Mars makes a revolution in 687 days, Jupiter made in 12 years, Saturn's complete in $29 \frac{1}{2}$ years, Uranus 84, Neptune 164 years

Pluto 248 years.

These different rates of produce aspectaciones planets (the value of the angle between two points), and when these are at a distance of 30 degrees from each other, are said to be in semi-sextile, 60 degrees when they are sextile, 45 degrees are semi-square, a 90 degree quadrature are 120 degrees are in trine, 135 degrees are sesqui-square, 150 degrees are

quinconcio, 180 degrees are in opposition, and it is said that two stars are in conjunction when they are in the same length.
Each planet, as well as each sign possesses a special
cosmo influence - biological, which is not a vague phenomenon, as
Nor are discovered random features. For example, the sign
Lamb prints a dynamism that never prints the sign
Cancer a native of the latter. Same thing happens with
influences of the planets.

If the Sun mark months to go through each of the twelve major divisions of the celestial wheel, also has another motion Pointing the great Eras. Indeed, to go to the track sign rate of one degree per day, in round figures (59 minutes each arcsec), you can not return to the same place every year in the moment, for this reason, in 1949 the Astro - King entered the sign Lamb on March 20 at 10 hrs. 48 m. 51s.pm, instant precise equinox, while in 1950, the Sun entered the

sign Cordero at 4 hrs. 35m. 26 sam, 21 March. This
Always check the equinox occurs when the Sun,
apparently passes through the point where the ecliptic cuts to Ecuador
celeste, which never happens at the same time each year.
This difference is due to different cosmic movements that
would be long to explain, however, is a phenomenon known
as the **Precession of the Equinoxes**.

This prolonged movement, by which our system
Solar 50 seconds every year arc moves, results in the
Great Year of Plato, 25,920 years. This period is divided into 12
cycles of 2,160 years (time it takes the Sun to traverse a sign,
in its retrograde motion), which corresponds to the these Great
Ages: The ERAS.

We note then, that while the sun walked by the sign
del Toro, the time was come that religions taken as
this animal emblem (the ox Apis, the Winged Bull, the Minotaur,
etc ...). When crossing the zodiac 2,160 times to mark the years, the Sun
has retrograded somewhat at each turn, as explained
before then, every 72 years to lose ONE GRADE will penetrate
necessarily in the preceding sign, ie the Lamb. In that
when Moses came down from Mount Sinai to preach no longer
was necessary to worship the Golden Berro (Age Toro had
completed), and then began the Age of the sacrifice of the Lamb.
Are well known all symbols of antiquity doing
allusion to this great era.

At the time of the birth of Jhesu of Nazareth, the Sun entered

be governed by the constellation of Pisces, and consequently there appeared a certain number of symbols associated with this animal. Moreover, the early Christians took the fish as acknowledgment.

With the year 1948, has begun a major new cycles in the history of mankind, the sun, leaving the sign of the Fish enters the constellation of the Water Bearer: is this the Aquarian Age. This age 200 years or so, will be characterized by the inherent properties of this sign: brotherhood, cooperation, union, merger, desire for knowledge. The very symbolism of this sign (the two wavy lines), and also will characterize Scientific and Philosophy, the Concrete and Abstract, the two polarities again found in all things and that the H:. Finally, this is the build was like our two columns.

The Age of Aquarius should signal the regeneration of our Institution, complete separateness of the Age of Pisces, with its

Thus, nothing is by chance, particularly in the sky, where the G.: A.: D.: U.: gives lessons to his eternal Humanity.

The four elements that make up the Self: Ground (skeleton, solid) materials, water (fluids, blood), air (gaseous element, breathing), fire (temperature) are found in nature, in whose bosom evolve.

In the Zodiac, these elements are well balanced.

In the early years, when the Sun will begin symbolic path track, dynamism comes naturally to be represented by the element of fire, in the sign of the Lamb. In all things the project first conceived the idea, desire, will fire action, the heat of the company.

Later, the sign of the Bull, which represents the earth element, comes to symbolize the balance of this part of the Zodiac: Calm, serenity, frequently, the bedrock of this area characterizing the specific purpose intended.

After conceiving a project, and the idea to be achieved (earth) are needed aid and favorable circumstances find in the air element. The third sign, Gemini, is governed by the air. And for this reason we represent two people, "Union is Strength", one helping the other.

Following this indispensable cooperation in life we have to having difficulties, anger, tests that characterize the water element. (The sea that prevents cross from one continent to another, and forcing the man to use his cunning and artifice avail ...)

Is Crab, address the water element.

The four elements mentioned above, represented for the first four signs, continue to manifest in next four, and so on, to go to form a quaternary trine in its components.

mention the four elements in Hebrew: nar, work, Hasui, ma, which refer to four words: **Know, Will, Dare, Callar**, the famous axiom symbolized by the four fixed signs of the Zodiac: The Waterboy, the Bull, the Lion and the Scorpion. These four signs are the points Sky important because they mark the position of the four royal star Aldebaran (Ojo del Toro), Regulus (the Lion Heart) Antares (Heart of the Scorpion) and Fomalhaut (Mouth of the Southern Fish). But the symbolism goes further. The great monument of esoteric the Giza plateau is not, in any way, an architecture any. This sphinx is a combination of Initiations Egyptian, reason holds a human head (**the Water Bearer**), an body **Toro** , legs and tail of **León** . This fabulous animal has wings, also to represent the transmutation of the Scorpion in **Aguila**

These great constellations represented on the Sphinx denote the full value of the symbolic synthesis:

SCORPIO (Transmutation), WATER (Ma), SILENT (on reality of dogma).

The adept who was brought in front of the Sphinx, knew well the three signs Zodiacial (Waterboy, Toro y León), but it was in vain to try to recognize the fourth fixed sign of Traditional Astrology. Only those who were sufficiently initiated into Esoteric Astrology could answer the mysterious sign of Scorpio was represented by its highest octave, the Eagle, and according to the explanation of this transformation was when you were authorized to enter through the gate placed between the legs of stone animal, and go to meditation chamber (on the head), where two large eyes were fixed on the new Disciple. 29

Members of Freemasonry must be seriously selected. For this reason, the Management of the Mas. Univ. no longer transmits its true teachings, but the esoteric lodges (M groups. These H.: M:> are those that **made** truly (represented in the figure by the **center 6**) meeting two symbolic reptiles praise: Science - Philosophy, Positive - Negative, etc ...) are those who know the real meaning of the 2 columns, and which are the point of union between them ... Moreover, the same direction with their Patriarchs started is represented here by Aguila (head), the High Spheres, the Empyrean world about Celeste. So the command no Aguila is only one emblem of the eighteenth century, with their meanings known in the Upper Gr. (More: Blanca), but goes back to the ancient times. It is a fact that the current Masonic notions are ordinarily misunderstood, that they try to teach others ... Indeed, there are rituals, and traditional symbols of our Institution, a beautiful lesson to learn. To raise again Freemasonry is necessary, first, that the scale of 33 degrees is rebuilt on its true basis and at its full value, and that study all the materials inherent in each grade. Is there, perhaps, many 12 degrees to know the principles of architecture? (Its title is Gr. M.: Architect). Are the 30 Masters in Kabbalah? (This is the meaning of the Hebrew word Kadosh) ... Many H.: M.: who know astrology? (Essential, however, from the degree 8 ° and in particular 12 ° and 14 °) ... You can not build anything on the land effectively without being Commander of the stars, ie, holder of astrology

Let us mention in passing the founding charter of Gr. Log.: of the Astrological Humanistic Masonic Order:

In this regard, the sun at noon is on the cusp of the house astrological X (Midheaven), which is related to the domain Business, social status, occupation, the situation in general. The astro passes immediately to the Ninth House, the philosophy, the influence spiritual. Perceived as immediately, the proximity between astrological symbols and phrases initiatory Thus, the profane man X in the House, the neophyte passes IX (of Spirituality), then the Sun reaching the eighth house (the death, and also the reincarnation) characterizes the M:.. leaving the material plane, then dies first birth in the upper plane, the House VII (Union, the Association, any idea of tie and approach towards a ideal) love means that Bro. Masonry is also a beautiful example and doctrine ceremonial and dramatically conveys the secret of regeneration the soul. For this reason, it is divided into two parts: Mas. speculative and More:. operational. Occurs where the Mas. is speculative in Temple, for it only a symbol of the human organism. The Mas. operation consists of a series of spiritual activities that made in the physical and psychic organism (transmutation that must operate).

The gavel (the will), chisel (the trial), the square (the matter) and compass (spirit) are all common symbols on which has already been much

A comprehensive study of this subject will be in our TREATY MASONIC ESOTERISMO we have in preparation.

The original French text reads: Magistes ie those who practice magic Ceremonial and Work, not to be confused with magicien that are jugglers, illusionists, theater artists witchcraft or any kind of low. and compass, to say something unprecedented about these symbols as known, offer interesting particularities related to its equivalence with the principles they represent. With the help of a compass we all know represents the spirit, is plotted not only the circumference, which is the graphical representation of And the infinite universe but also with the same opening compass can build on this circle an equilateral triangle.

Not insist on the value it has for us this figure geometric, but especially call attention to the fact that We have thus divided into three equal circumference arcs, with a value of 120 each, which is equivalent in astronomy a harmonious appearance. By contrast, the square symbolizing material, is constituted by an angle of 90 °, which in astronomy equivalent to a dissonant aspect.

The rough stone is needed for styling the stone cubic, attracts our attention, not the workmanship symbolizing improvement to be attained (abandonment of the passions, loss of atavism, etc ...), but by the graph in which we will stop for a moment.

The mallet, chisel and square, are the attributes of Ap. And Each of these tools has a symbolic interpretation, which corresponds to the qualities called for in this first grade. The gavel is the strength of the energy needed for the work to be controlled, and chisel, symbolizing intelligence, helps direct actions. The rough stone gradually takes shape, thanks to the Beats chisel gavel on the size (is directed will for the reason). The squad features righteousness necessary to man social reforms that ambition and elevated ideals.

The cube, split or broken into six sides and they extended on a surface has a shape of a cross, which immediately reminds us with his arms the action of the four elements, each other, and the four states of matter.

These four arms of the cross also symbolizes the four corners

The cubic stone is the symbol of the adept on domain
elements and beings (salamanders to fire, for Gnomes
Earth, Sylphs and Sylphides for air and for water Ondinas). The
four extremities of the cross also represent the objects
indispensable for magical operations: the rod, the sword, the
pantacle and cup

41

41 The two main paths of the cross, are the
sword and scepter (powerful symbols of higher degrees), but even here
means the horizontal and vertical matter spirit.

Finally, this is a philosophical synthesis, which involves a
willingness to act boldly for improvement (is the weight
placed in the balance of free will). Destiny is not a thing
immutable, because otherwise there would be responsibility, so it is
need to **KNOW** that the designs of the G.: A.: D.: U.: are
impenetrable, but we have a freedom to act in either
sense, we need to **WANT** to any spiritual food
price; uS necessary **OSE** in the effort with full
knowledge of the difficult path that must be traveled to reach
Initiation, and finally, you need to **SHUT UP** about
indispensably teachings and meditate before decisions.

The Bible, the universal key, is an esoteric monument
offers, or prophecies, or basic instructions for the
occultism and Initiation in general. The four big words
quoted in many occasions, are benchmarks for deep
meditations, and found in this holy book passages
corresponding to the choices that we must learn.

It is essential to understand the Bible

must be taken more
by the spirit than the letter, almost all of it is symbolic, figurative or
hieroglyphic. Some names of people, places, etc., Are single-
mind alchemical, magical, astrological or Initiatory representations.
For example, Isaiah means Medicine of the Philosophers (see
Chapter 46 of Isaiah, "You send a worker")

43

JEREMIAH mean Marrow of Sacred issue.
DANIEL (fifth son of Jacob) means Spirit of God.

42

The Bible and all other holy books, the Koran, Talmud, Popol Vuh,
Upanishad, etc ... are works that should be read according to their keys, failing
not found there but a moralist literature, or social code, and nothing more ...

In Ostervald version is written (chapter LVI, verse 6): "...

This was done to hide even more, which was already evening in the Pentateuch. In this regard, we have already seen in the first chapter, the value of eponyms, which in no way come to deny the legendary characters, but add a real sense history, facts and philosophical importance.

The three traditional spelling Masonic points, would lack value if only serve to ensure, to the reading of the profane, certain words, and this is the belief of most of the M:!: ... The historicist tradition wants the Gr. Or: France would have been the that for the first time he had used in 1774 and gave the meaning: Wisdom - Strength - Beauty. However, it is a mistake to believe that symbols are modern, as well as Freemasonry attributed to this same medieval times, where the historians want to take ...

By the way, the Templars had a predilection towards number 3 (Each knight had three horses, received three detentions, etc ...) likewise, the numbers 6, 7, 8, 9, 12 and 13 were for them a similar importance. You need to realize that the symbol of the Trinity is much older, and notes from antiquity: birth, life and death, as well as youth, maturity and old age. The three points, then, come from a more ancient symbolism; back to the time when the Wise Schools were represented by these points and were recognized as the North just point up and two points at the base, with an apex upwards, as well as those belonging to the South identified with the point down and two points of the base upwards.

It is necessary to preserve this symmetry that points ∴ equivalent to the triangle of Colleges North, so corresponds to the positive polarity, the Western teaching (Column J ∴, and which is opposite to the points ∪ characterizing triangle corresponding to the Lunar South aspect) to Initiation Eastern passivity (column B ∪). In another point must be at right angles., hiding the bracket and rules the universal construction, when s located below the Masonic language words.

With respect to the number, recall that only the odd are sacred

44

, naturally, about 3 of the manifestations are inexhaustible (aspects of Sol: aurora,

meridian, twilight, human states: physical, astral, divine, etc ...)

44

Do not forget, to illustrate this statement, which is taught by symmetries found only in beings endowed with life. The inorganic matter is not present but symmetries of even order.

7 represents the seven planetary angels and all other
meanings we already know (seven main colors of the rainbow,
seven musical notes, seven planes of evolution, etc ...).

Seven is also the number of holes we have in the
head and requires great meditation to understand (make) all
mystery ...

With regard to the number seven, call further attention to
the sacred word of the first degree of the French Rite, which is the singular
of the sacred word of seventh grade

the circuit and the relationship between these two Masonic degrees.
The Thodol Bardo (Tibetan holy book) is based on the number
symbolic 49 square sacred number 7. This figure has been long
time for sacred arias and other races. His role in the revelations
San Juan well illustrated, and the notion of considered holy
seventh day, gives us the reason why it has been consecrated to the Eternal.

3, 5 and 7 are permanently as the foundation of
But numerology., as being encrypted symbols of the three
early grades correspond to truths that are Initiatory
explained in due time.

9 is the number of the generation of the seed and
reincarnation (requires 9 months of gestation before birth),
solvent serves all numbers without ever associating
or by any amount or by multiplication.

Thus we have:

$$9 \times 1 = 9$$

$$9 \times 2 = 18: 1 + 8 = 9$$

$$9 \times 3 = 27 2 + 7 = 9$$

$$9 \times 4 = 36 3 + 6 = 9$$

$$9 \times 5 = 45: 4 + 5 = 9$$

$$9 \times 6 = 54: 5 + 4 = 9$$

$$9 \times 7 = 63 6 + 3 = 9$$

$$9 \times 8 = 72: 7 + 2 = 9$$

$$9 \times 9 = 81: 8 + 1 = 9$$

45

Note in passing a big mistake Mas instructors. who instituted the same sacred word in the first degree of the French Rite and the second A Scottish Rite. and A: .. So that if J pronounce the sacred word. The H.: M.: French think that this is a Trainee, when in fact it is a Fellow Scottish Rite, and inversely with the sacred word happens B:!

We can also obtain:

$$222222202 \ 123456789 \times 18 = 18 \ 1 + 8 = 9$$

$$555555505 \ 123456789 \times 45 = 45 \ 4 + 5 = 9$$

$$123456789 \times 54 = 666666606: 54 \ 5 + 4 = 9$$

$$777777707 \ 123456789 \times 63 = 63 \ 6 + 3 = 9$$

$$123456789 \times 81 = 999999909: 81 \ 8 + 1 = 9$$

Regarding the number 12 is obvious mention as exponent of the Zodiac, of the Apostles, of the Tribes of Israel.

For number 24 (representing the media-signs Astrology), we turn to Revelation chapter IV, verses 4-7, where mention of the 24 Elders of the 7 lamps, and the 4 animals (24 Geniuses hours a day - in Persia, Izzids - 7 planets and constellations ... 4 large)

A number of religious forgot the important part of the science of numbers. The cirstianismo, for example, should have with a Mystery School, since its founder was a Great Initiated in the mysteries Essenes (in accordance with school Pythagoras and the secret schools of India).

St. John himself, in his writings gives proof that the Master Hierophant Jhesu was well versed in the ancient Arcana and I was familiar with the ritual of the Egyptian cults. San Mateo was Master of Basilides, the immortal Egyptian sage who founded with Simon Magus in the Church of San Pedro, Gnosticism (the system more complete Christian mysticism that existed ever). During the early Christian era in Rome, Christianity I was in close contact with Mithraism (philosophy of fire in Persia) and it was from there that derived most of the rituals and ceremonies of primitive Christianity. Therefore, every priest Christianity, every minister of the Gospel, an anatomist should be a physiologist, an astronomer, a philosopher and a mathematician.

Pythagoras attached great importance to the numbers 7 and 10 that 7 is the sum of 3 and 4, which means the union of man with Divinity. 7, which represents the law of evolution, is the figure of followers of the Great Initiations and expresses the full realization of all things in 7 degrees. 10, formed by the addition of first four digits together ($1 + 2 + 3 + 4 = 10$) is a number perfect and divine, because it combines all the principles evolved meeting a new unit.

Page 76

As a small example purely intellectual order, we we allow to present some mathematical curiosities.

There quadratic relationship between numbers 13 and 16. In effect, the 16 is 256 square of the sum of numbers gives 13, and the square of 13 is added 169 whose numbers gives 16 ...

The only numbers that are perfect cubes: 1, 8 and 27, are also equal to the sum of the figures in the cube:

$$\begin{aligned} 1 \\ 3 \\ = 1 \\ 8 \\ 3 \\ = 512 = 5 + 1 + 2 = 8 \\ 27 \\ 3 \\ = 19683 = 1 + 9 + 6 + 8 + 3 = 27 \end{aligned}$$

17, 28 and 26, without being perfect cubes present nonetheless identical properties in relation to the sum of the digits of its cube.

It's called the perfect number having the property of being equal to the sum of divisors each other. The first six numbers are perfect the following: 6, 28, 496, 8128, 8589869056 33550336 and therefore in effect:

$$\begin{aligned} 6 &= 1 + 2 + 3 \\ 28 &= 1 + 2 + 4 + 7 + 14 \\ 496 &= 1 + 2 + 4 + 8 + 16 + 31 + 124 + 248 \\ \text{etc. ... etc. ...} \end{aligned}$$

To end this symbolic numerology, we quote the number 142857 magical than having multiplied always presents the same figures that compose it.

$$\begin{aligned} 142857 \\ 142857 \\ 142857 \\ 142857 \\ 142857 \end{aligned}$$

legend to distract an Indian Prince who had lost

Lahur Sessa, came to offer a game of his own invention which consisted
a large board divided into 64 equal squares, on which
evolved a king, a queen and her subjects. The King could not deliver

battle without the cooperation of all its parts to lower around, such was the rule of this game that provides Lahur Sessa Prince, while a judicious praise. Prince experienced such pleasure with this game, which gave the Brahmin which he establishes his reward. This was content to respond to allocate a grain of wheat for the first square of dash, two in the second, four in the third, and so on sexagésimacuarta box to always doubled, and I were you given the total sum. The prince immediately ordered meet demand so modest in appearance, but having been made calculation, he fell on his face when his treasurer came to inform you that the total amounted to:

Lahur deliver Sessa, amounted to a mountain that has as basis the capital of the kingdom and was a hundred times higher than the Himalayas. It says that the king did not keep a grudge the Brahmin this second lesson, and immediately appointed his prime minister.

A Iniciático mystery of great importance, is enclosed the dispute (the unit is subtracted) between the two truly astronomical numbers: the sixty-fourth grade vibration and the total of sixty-four squares of chess. (64

by reduction equals 6 plus four equals 10, which is in turn equal to 1 plus 0 equals 1. The sum of squares is equal to 64 2080, which is equal to $2 + 0 + 0 + 8 = 10$, ie one more than 0 equal to 1. That is, by reducing is equal to unity subtracted from: 18,446,774,073,709,551,616). It would too coincidental that this was a random event occurring on especially if we reflect on the two colors of the pieces in the game (black and white, positive and negative pole, the sun and moon), and the black and white squares on the board, who played with a singular purpose the tiled floor of our temples ...

The principle which has been mentioned, whether or not discernible to our sensitivity, remain identical. Thus, a vibrating string

the square root of its tension, and inversely proportional to the root square of the density, which allows, by knowing such factors make rope with the desired colors.

There are the same relationships between numbers and elements chemicals, everything is governed by the same laws, whether the system planetarium or the diatonic system.

With respect to the mathematical relationships

it is necessary

Originally mention Zoroaster, who had a table in front of the

" (Communication of M.: V. Gr. Maestre, dated March 11, 1957 E.: V., At 20 of the Fish Year of the E IX. A.:)

The laws of relationship between numbers can be between the numeral value, secret value (VS) value squared, cubed value by decomposition, addition, subtraction, reduction, theosophical addition, partition, investment, circular permutation, synthesis, ligation, expansion, restriction, mutation, male and female symmetrical readings, sexualization and recombination. By notárica, themoura, cyclical affiliation and multiples, submultiples, etc.

I - The number by subtraction or addition make the difference between two numbers, numeral indicates the value that meets or separates (the ratio or difference between 2701 and 2812 is

111, for example).

II - Taking into account the training process all secret value that is manifested in the overall training process (paleontogénesis and taquigénesis), we can establish that: All genetically proceeds previous number and therefore resulting in its meaning.

III - The secret value of a number and the secret value of another secret value is equal to synthesis number (if any), as in the case of the VS 48 enclosing the array of 38 and 29 through the sum of their respective secret values.

IV - The secret value invested secret value linked to another number equals the value secret of another number, if any, as in the case of the secret value of 33 polarized 165 and is linked to 3, which is the secret value of 2, gives 1653 which is the secret value of 57.

V - Factors of a number are factors relating to the secret value.

We note that 29×5 equals 145, the secret value is Bereshith.

VI - Taking the case of 5, which makes the square AIN-SOPH action, and that the bucket action makes Kether, in the passage from the unknowable, Number cubed action makes it manifested.

VII - The reduction (also called addition) Theosophical a number is the sum of their numbers reaching the fewest gravitation. (166 is equal to 1 plus 6 plus 6 what

is 13 which is equal to 1 plus 3).

VIII - The expansion of a number is inserting a zero in the center, and thus they are still interspersed symmetrically around the center, zeros, alternating between remaining figures. The constraint, on the contrary, is removing the zeros also symmetrically. The zeros have no value determined in esotericism but in the arithmetic manipulations, since "zero externality is the symbol of a null and impassable to the bosom of Being "below.

Exp

N. in Exp For example: 23 276 2070 6203, ie 23 has its secret value is 276, its expansion is 203, which is a secret value 20706, which in turn is 276 symmetrical expansion.

X - The investment of a total mark their opposition, as in the case of 18 and 81 or 38 and 83

XI - Mutation is the inversion of a part of a number such as 465 in the example of which becomes 456

XII - Ligation is to form a single number as two numbers without adding them, as in the case of the ligation of 30 and 95 that resolves 3095 (MEM open Quabbalah).

XIII - The decomposition of a number can be done by removing any one or more of their figures, empelando all or part for a relationship, but that relationship will be greater when the similarity with the number is complete. Decomposing 10 and 26106 have 266 (266 is the first value of the word skies produced by 38 times 7). In 6216 (value 111 Secret of the Divine Trinity). 26106 is also the secret value of 228 (product of 38 6, "the seal of the organization and conduct").

XIV - Circular permutation is the sum of possible permutations of the same number. Example: 785 over 857 over 578 over 758 over 875 over 587 equivalent added 4440 444.

XV - The direct reading is symmetric by adding the figures from the ends of a number, invested with the central figures of the number. (6216, read 66 plus 12)

XVI - The direct male reading is adding the first part, the second part of n number figures (6216, read 62 plus 16).

XVII - The male reverse reading is alternately adding the digits of a number (6216, reading 61 m 26)

XVIII - The open reading women is reversed by adding together the first part with the Part of the digits of a number. (6216, read 26 plus 16).

XIX - The female reader is closed by adding together the first part, the second part inverted figures of a number (6216, 61 reading 62 more)

XX - Notárica is the method of collecting the corresponding letters or numbers taking them from different places of a word.

XXI - Thermoura is the method to do permutations between the letters of a word or their corresponding numbers, to obtain a value.

XXII - And all these numerical manipulations together.

Based on the Mystery of Numbers (Psychological Purposes, booklets II and III).

Seventh and Decimotercios

The names of the musical notes come from the first stanza of the Hymn of San Juan Bautista:

UT quent laxis
Resonare fibris
Mira gestorum
FAmuli tuorum
Solve polluti
Labile reatum ...

The name of the seventh note was taken from the fourth verse of this stanza begins:

Ionannes Sancte ...
whose initial note with SI was formed.

However, it is closer to the truth another solution recently discovered by a mathematician from South America.

The arquométre is the instrument of evocation of the past, necessary for the construction in the present, as a means synthesis and regeneration throughout the intelligentsia future.

A system that can not only meet all matches, but also serves to decode the mythologies, legends, religious, etc., by a method Architectural, meeting in the presence of all the possibilities Eastern traditions to continue, western, Semitic or arias ...

It is known that the true initiation is not transmitted but lip heard. However, there is a precision instrument particular that

This system is archaeometry, science is truly

necessary to resort to occult societies, esoteric centers

It is time to talk about archaeometry, synthesis science
wanted to address just now.

This centralization of knowledge, from the broadest
antiquity to our modern times, has been the secret
depths of a few initiates. It is true that to address it is
needs serious technical and philosophical training, not forgetting
lexical minimal baggage.

However, its current implementation becomes possible with the
use of a work tool for all paths,
artistic, literary or religious compositions.

The Arqueometre is an instrument which served the
old to set all esoteric religions myths.

In the canon of ancient art in its various manifestations
architectural, musical, poetic or theogonic. It is the sky that
speaks: every star, every constellation, it becomes a letter or
phrase or an enlightened divine name with new irradiation,
ancient traditions of all peoples.

expressions arise according to a defined method, builds nothing,
but presents the principles abide wish to undertake
which such or paths.

The mainly arts resets its synthesis, readjusting the
expression of the true sources. Give the key to the successive
religious and scientific antique adaptations. Allows the
architect build forms under a name, an idea, a
certain color, respecting the vibrations emanating from a curve
harmonics, because they correspond to a planetary influence
related to the source of revelation.

It is the instrument of evocation of the past, required for
in this construction as a means of synthesis and regeneration
the entire intelligentsia in the future.

It is well understood that, as all comes from the One,

there is a law that directs each line and why each graph, each drawing, each sculpture, to refer to a symbol, an idea primary, a spirit, as a glimpse of a genius. It has been precisely the composition without rules that has promoted degeneration of Art, the abandonment of these codes has deformed the sculpture, painting, music and literature, materialistic phases exempt from discipline, as artistic expression, in any mode must be a manifestation of G.: A.: D.: U.:

We must restore the sacred art is the vivid expression of Word.

Whether it be the creative Word, incarnate or resurrected, He is the existence of eternal life, and this life turn across the synergy of divine wisdom, all the energy of divine love is the existence of life with his royal sovereign gift of grace. His laws direct are not abstract, they are living, are the Beings created, existing and subsisting.

Thus, it is easy to see that a symbol changes has suffered because the Arqueometre is represented as a planisphere especially, expressing us a graph of the science of cosmological and morphological correspondences, based on the word and their equivalents.

Naturally this science can be applied to all trades cosmetic, however, the synthesis has been represented monumental by religious building which is going to devote a paragraph.

Everything emanates from the Great All and all acts is to reintegrate involution and evolution ... follow this inspire - expiry of the Cosmos, is to work in harmony with the supreme law. Mission M.: M.: this is enforcing this criterion.

From a ceramic or glass, to a monument, nothing constructed without containing the teachings of Gr. The desire for improvement can be tempting but no thanks to Great Instructors example, our I.: Patriarchs. From the gate we cross to get us into the light

In a word, we refer to the absolute necessity of having archaeometric knowledge, both to address the lesser degree whatever the ritual to become Gr. existence of all these things, even when they have a full knowledge of them.

The Arqueometre item is a translation of the verb, as, color, fragrance, taste and resonance. It is a synthesis of form contained circular divided into concentric zones containing correspondences of names, letters, notes, zodiac, planets, alphabets (Wattam, Hebrew, Latin, Samaritan, Chaldean, Assyrian) vibrations in correspondence as a metric pattern reform sound measurement and can serve rule for proportions aesthetic graphics drawn.

Primary, yellow, red, blue, colors are distributed in

trine within the circle, so that the white color is theoretically always existing at 180° opposite to each of these three colors, thus resulting in this way, three hundred sixty nuances defined and each is identified by a number of order to quickly discover its exact composition. By Of course, the relationship of music are there registered under inversely proportional to the standard physical method of measurement current: (D flat) = 100,000 or 1 meter, the figure $100,000 = 625 \times 160$). The layout of a form, whatever it is, becomes thus a key expression of a universal canon. That is, with under a single name or a single idea (also by color or sound) it becomes possible to obtain a picture, a graph, entire building, with the exact proportions of width, height, etc..., whether it be an aesthetic monument construction religious, etc..

With a reverse procedure is also suited to Literature colors, shapes, etc ... This intimate concatenation words, ideas, ancient sciences, symbolic studies, allows, in lack of documentation or files, rebuild any religion, philosophy or legend, with a play on a paper or foil, the constitution of the sky. Once I discovered the numerical value of words matters little confusion of languages, the letters are preserved in this way forces original, ie the sacred idea (MA in Arqueometre is equal to 40, and closure, and several oriental languages Vattan want say: WATER, inversely, in the west end of the Incas pronounced ATL

Moreover, how do we interpret the constructions whose instruction is given in the Bible (Exodus Chapter XXV, XXVI, XXVII.; Ezekiel cap. XII; Reyes cap. VI) If the calculations are not proficient archaeometric?

Here are some cases: In the Exodus, chap. XXV, vers. 10, said: "They shall make an ark of acacia wood (acacia) whose length shall be two cubits and a half ", which gives the note B flat (and all its

correspondences), so all this should be interpreted description. In a passage from Ezekiel, chap. XII see 8 indicates that the As cane which the angel would be to measure the temple was six cubits, the total number of divisions of the choir was 24, $6 \times 24 =$ 144, the length of the rod,. 144×500 (in verse 15 comes to 500 measures this rod) = 72,000. Now this number is obtained equal to the note G, ie, the octave of the musical scale divided between 144,000, yet here is correlation, but chose not extend the definitions.

The study should be done in archaeometry lodge and we will not extend his analysis here.

To end this chapter we will say a word about the Great Arcane, ay! As often ignored in lodges, because of the low Instructors knowledge.

It is in the Bible (Exodus, Ch. IV, vers. 3 and 4) where it has been extracted the important basis of this graph. Morality rests primarily in the act of transforming organic and inorganic, by extension, immaterial material in objective and subjective. This is equivalent to Masonic saying that laws should not remain in a state of projects, the lessons learned from the Gr. M.: should be put in practice in daily life.

In this symbol, what has been called Corona Ecclesiastical Institution is the same, the lower part, where the hand holds the sword, it is the neophyte (the candidate, applicant) in the circle, at the junction of the two tails snakes, the candidate begins truly to belong to the Order, and if we list the grades according to the Scottish Rite A: and A:. (Often using for exotericism and explanations for all examples)

then we have:

In the first period (after the handle) intersecting with circle manifest the three basic degrees: Apprentice, 50

We could make subdivisions graduation regarding any ritual, the which, however, are reduced to the same basic proportions.

The sublime grade 33, Initiation by its importance, should be characterized by some

particularity; occupies the binding site between the two heads of the snakes, symbol of the Divine spark, which arises from the two major universal polarity.

Let us look to the outside of the large circle in the highest, is find a stylized flower lis, symbol of trinity governs the institution. Is esoteric command, which we have already mentioned, and which in turn is located below an upper point powerful symbol of directors.

The central dividing line is very important because they show darkness and light, as we have defined in the description of pavement lodges.

Both in the shaded area as part of clarity, the Cross is formed by the action of the four elements, in order to remember the famous axiom: What is above is like what is Down to the miracle of the Worlds is met. The outline medium form a X (the cross of St. Andrew), which is the Greek curette KHI, initial KONE (gold) of KRUSOS (pot) and KRONOS (time), three Greek words on the basis of alchemy. It is the triple mystery of the Great Hermetic Work. Note that two triangles are formed identically: one with the tip up on the dark side: is aspiration of the material world to G:. A:. D:.. Clear on the other side with the tip down: is the spiritual decline in aid of a portion of humanity with the cherished ideal.

With the horizontal line, as the bottom circle diameter, pierced by the sword, which is the base of the triangle whose top is the center of the large circle while the height of a truncated pyramid (formed by the diameter and the lines continue the triangle), it becomes apparent the Masonic work before being met and finish in this world (dark side).

In the same figure the upper circle appears as a cone truncated open, enclosed in a circle, to remember the mysteries of raising, in fact, is the projection plane of a solid geometrically mysterious whose esotericism is known for the Initiates.

It is well known that the circle represents the magical protection traditional knowledge and is kept secret.

The two snakes (two columns), the senses and reason are SOLVE-COAGULA of magic; dispersion qualities and condensation are in the occult, the foundation of all meditations before a job either.

-
106

Page 96

This asset - liability is intuition and analysis, all H.: M.: must perform to their salary increases. Overlook all explanations about the sword ... that are the domain of our Order however, call attention to the fact that this dick which the Bible speaks in Exodus, it is also the subtle force whereby adherents may rise. This central power (Kundalini) goes through the various neuro-fluidic centers (Chakras) to be light, it is necessary to live the initiatory degrees, for the simple receive degrees fact is not evidence of evolution.

Therefore, there are seven major states (seven chakras):

1. Handle with hand represents understanding

Two. The intersection of the two snakes: the entrance to the trail Initiation.

Three. The cross in the middle of the bottom circle: participation in building a better world.

April. The center of the large circle: the instruction to mankind.

May. The cross in the middle of the upper circle: the organization Initiation

6. The meeting of the two heads: spiritual realization.

7. The top opening: Reintegration (or Universal Address).

Naturally, you can once again be used here the axiom SABER (in the early grades), WANT to take part in the Great Reconstruction work, OSE show people your ignorance, but regarding the Initiation SHUT Organization, In order to avoid distortions, not only committed by the world profane, but also by inexperienced young followers who are left drag even by appearances.

This leads us to speak of the plexus, ie, points sensitive and nervo-fluidic our body, as related with planetary influences. First, is the plane

Saturnian (corresponding to the sacred plexus Muladhara) symbol physical testing of physical evidence, vital struggles of mortal laws, etc., which is the characteristic of the profane and neophyte is still attached to it.

In the second center (intercept of the two tails snakes) H being the neophyte reaches. M.: and Jupiter (symbol of personality), who characterizes it. Assumes a position, enters the

Ecclesiastical Corona; admission to the institution has been a decision important in his life, he has imposed his personality, that likewise corresponds to Saturn: the death, however, is must live, even more, to revive. These two planets are related to the first word KNOW.

-
107

Page 97

Then, the third corresponds to the solar plexus center: Manipura-chakra, is one where you learn the mysteries, attempts to transmutation, is the word WANT and is the planet Mars who governs.

Accepting the importance of all Initiation adept at climbing Path to conquer the fourth CENTRO, one that corresponds to cardiac plexus led by Venus, symbol of love (which is why the heart is mentioned, when it comes to feelings or effects ...) and belongs to the word OSE, is achieved here delimitation of darkness and light ... darkness is required for to emphasize the Clarity ... darkness is necessary as substratum of light, evil is the foundation of good. Here explain the obscurities of the Bible and the secret of the temples. Of this dualism born enigmatic dogmas of Zoroaster, expressed in Hormuz, the face of Light, and Ahriman the head obscura. Mastery of the elements is then updated, Bro. M.: is the degree to which it is imperative to be instructed, it becomes necessary universal love. This horizontal line called Throne of Justice just involves the abandonment of personality and sympathy individually. From this line is the celestial harmony (zone of clarity) and is necessary to penetrate a pure heart. Here of course, the knowledge is essential, so that the degree A Scottish Rite. and A.: is so important, in fact, defines what material from the spiritual, control of the qualities, expertise of science, etc..

51

Anyway, coming to join the fifth center in clarity, in full understanding, the word SILENT. She does understand the need for well-targeted education on pain of disastrous consequences. The M.: here acquire all the knowledge of the importance of secrecy, is the center for the pharyngeal plexus ruled by Mercury, symbol of the word (which amounts to confirm the importance of Knowing what to say, or Knowing what must Callar).

Saturn, Jupiter, Mars, Venus and Mercury are represented in lodge the steps, as we have said, the last step,

symbolized by Mercury, expresses very well, we repeat, that before reaching the Venerable chair is necessary to measure their words. Mercury is the messenger of the gods and thus should be the last stand to climb.

The last degree of the graph is the 33rd., Or representation sublime and for this reason is that the number of its holders must be limited: it is indeed a unique position, it can sital be here for many. Spiritual realization not encompasses communities (many are called but few are chosen) and symbols **living** of this Center are more than limited. The polarities are back, and this time no longer queues as before, but the two-headed snakes (the head's intelligence).

These two snake heads, where the fluid that escapes rises to M.: the supreme state, means the balance of the two ways: reasoned and intuitive, the two principles, objective and subjective, science and philosophy.

This part of the symbolism corresponds to the High Mountain

to which relief can be given, for what is shown in graph, exists in concrete form (highlighted graphically) for Initiates.

Indeed, the latter center (taken in the esoteric sense, it is beyond the secret address) as in the case of the first center that is located at the bottom of the graph of the Crown Ecclesiastical (which actually corresponds to the second, then the symbol Grip still belongs to the secular world), are in a similar position and both located on the circumference, and demonstrate Universality of the Order is the true Catholic group, but understood here in its proper sense.

CONCLUSION

We arrived here at the end of this work. We do not believe there many Masons who know the varied and inordenados topics Here we have addressed, and which are but the ABC of Freemasonry. Some will say, and rightly, that apart from the explanations of Use subsequent to its advance in degrees, or other allusions metaphorical and empty that they have made in their workshops, have never been treated the same subject in the lodge.

Here is precisely the expected answer type in 99% of cases. And it is precisely against this state of things that rebels our consciousness.

It seems that fate has bitter against our unfortunate Order, and not content with seeing his spirit warped by pride and ambition has led her to submerge in irony and ignorance nonsense, in the sterility of "White Nights"!

It is necessary to restore the universal Freemasonry their dimensional primitive virtues and powers. It is imperative to re-establish Magic Word and the deeply spiritual nature of the Esoteric initiation as the primary basis and as the splendor of the s emancipated soul.

It is unacceptable that a Freemason, worthy of this title, is deliver their services, and let chain alcohol and the snuff. It is unfortunate that a Mason eat meat, so their atrophying intellectual faculties, and spiritual, and thereby animalice. This is intolerable that a Mason Initiatory flying their prerogatives to serve their economic or political interests. It is scandalous that the Most of our initiatory banquet ending in orgies abject, thus calling into question the condition required the recipient: "Healthy body, healthy mind"

53

. But it is, above all,

53

It is the formula of acceptance of a layman to the ranks of the institution. Really

it is known that physical defects, the defects, mental imbalance, the powers Incomplete preclude the possibility of an Initiation that requires perfect balance, in order that the recipient is opened to all the fumes, and Similarly, we know that the neophyte must be a chalice to receive this transmission of power, which he applied to the Master for the disclosure of initiatory knowledge.

It has often been discussed on the subject of banquets. Indeed it is a rite practiced by the ancients, but which has lost its true value.

For example, among the Essenes, the novice-candidate remains in the fasting state for several days prior to initiation, and once recently promoted, had the

-
110

Page 100

unacceptable to have lost a precious time in explaining circumlocutions to exhaustion of a ritual that is not understood, and a children's symbolism.

The occult sciences in all they cover, they should present no real mystery to Mason. It is also unacceptable that in our lodges ignore astrology, yoga, magnetism, magic, alchemy, archaeometry, and all other branches of sacred science, exclusive to Saints Saramas of sacred science, exclusive to Saints Shrines since antiquity.

It is urgent that a regenerating and quickening wind will blow between our columns, and come to sweep the dust of our head and back precursor powder is a sign of our mummification.

It would be interesting to dwell a bit on the ideas fundamental kabbalistic, which define how well the approach problems, but this is beyond the scope of this small exposure, especially since we are nearing the end.

However, we should mention a small example of philosophy synthetic. In the Holy Kabbalah, the Truth is called the EMETH Hebrew word composed of the first and the last letter alphabet (Aleph and Tau), gathered together by the "average" letter (Mem).

Truth can not be but only ONE, the intricacies are numerous. We would like to make these appointments because we want to show it belongs to the category of francmasónica instruction.

Compass, whose two legs are joined at the top, is a magnificent symbol of creation, and expresses the first attributes G: A: D: U:, At the time when speaking of the beginning of the creation (Genesis. chapter I, verse 3) it says: "Let there be light please ... "and we could realize that the biblical quote mentions

of: "HE SAID ..." Then, we have the right to ask: A God who speaks? The Who said this, because after all, the Divinity could not express, as yet nothing had created. This is where it becomes necessary to perceive the movement of the Cabalistas, because they have said it is Elohim who "does" all this and speak to their direct attributes (the supreme splendor): right to come and sit at the table, which was served in a banquet his honor. (Grape juice fermented completely vegetarian foods, is was abundant food, but healthy and natural). The ancients make the offering and apply the great parable: "Lunch in the same table" ...

Sefiros intellectuals are the Jehovah of the right and the Lord of left. To LIGHT (as for everything else) is necessary to bring the two polarities. Indeed, to transform ONE two must bridge the gap between the two, with a third touch one to the other ... Likewise and further clarifies the mystery with compass, here symbolizes the mem. Then circle plotted the instrument, is a perfect symbol of created universe: the manifest world. (We know that the Absolute symbolized by just a point).

Thus, two lines start from the same point as for a triangle, diverge until a third will join them (Elohim is with the two aspects of Jehovah)

Would be too long to analyze in this way the line, circle, triangle, ellipse, parabola, like all other curves widened, whose equations can colacionarse with those found for the word EMETH, which is thus a Perfect G emblem. A.: D.: U.:

Another issue that must be addressed is certainly that of Great examples inherited from our grandparents, but by do it in this case to go back to antiquity. Those examples serve not only for but for all Masonic Initiation branches of activities in decline today. Thus we know that EL ARTIFEX of the ancients was not only the man who exercised an art or a craft, but also that art or

that profession which itself represented something else, because everything it rested on real principles. Its activities, which depended Always deep principles, only transformed following a certain direction, rather than being reduced to a occupation so material, as in our days.

The most ordinary acts of life always are of a character religious, taking this statement in a correct meaning is say, in the true and natural sense, ie with the idea of mission accomplished, and we must understand, as domain consciousness that operates acts as a mechanical rather than unconscious ...

Hence in the Hindu doctrine, we find a word we better understand this notion does work correctly deployed, as the term is swadharma compliance each being of an activity under its own nature. It is precisely their lack denoting the failure of secular conception.

Fellowship or brotherhood of craftsmen officials, is beside edifying on this topic, because it is not just a fraternity corporate, not a vulgar working group, but rather those two aspects with even much higher idea, as corresponds exactly to what is related to EL ARTIFEX.

Antique artisan guild officers lost in the mists of time. Generally said that dates back to the time construction of Solomon's temple. Indeed, the files teach us certain facts as ceremonies, various scenes, characters, listed as a witness. To cleavage time, this was the usual Mosaic Initiation, and which very few corporations of artisans have preserved. Hence arise monasteries, halls of science and the arts.

We found a San Benito and San Bonifacio, who built a class especially monks who occupied the work of art.

In the eleventh and twelfth centuries the art was dislodged, and fell from the monks the laity, but the example of his predecessors helped the

continue this fellowship lay on identical rules: maximum oral expressed most often by symbols Geometric and which communicated only to initiates. The life they should be religious, quiet, honest, exemplary ...

After a long time, these craftsmen were still in possession of Royal Initiation and this character is easy to find, just in the fact of the two major festivals celebrated on the solstices (San Juan, San Juan and summer, winter). These two phases of

zodiac cycle were designated in this way, after Christianity, but actually originated in Janus (name of which comes the name of the month January - enero, january-, and has placed as the beginning of the year). Not dwell in Janus with its two faces, which apparently a look at the past and the other the future.

The Brotherhood could not disappear, despite the French Law of 2 May 1791, which abolished the "jurandes" the maestrazgos and all privileges of the old regime, and made also disappears official corporation, instead of reforming their abuses. The Act 14 June 1791, passed by the Constituent Assembly, barely reached lay confraternities dormant during the reign of the clubs Jacobins who distrusted anything that had a idea of independence. The decline was felt only in the late nineteenth century (in 1848 they were still in full force), but after 1870 all companies adhered to one of the following organizations:

The Federation of Guilds (1874) which became Fraternities Union (1889),
A Duty Societies, and
Responsibility of Freedom.

It is true that was slowly disappearing true Initiation sense of these groups, and was the only corporate system and its exoteric. However, there remained always in working class communities, some elements INITIATED, then the true hidden meaning is well preserved by some teachers.

Furthermore, it is not necessary to believe that only the corporation of architects were esoteric knowledge.

For example, the locksmiths taking a problem for the realization bolt-type: in effect, it was to transport certain names figures, ie, take the numerical value of sacred words establish measures and foremost, this required a symbol, which has always been at the core of Initiation, well above the construction material itself.

-
114

Page 104

Thus, the bolt - type comprised of:

- 1) The numerical value of the Hebrew name Iehovah (26)
- 2) The numerical value of the Hebrew man ADAM (45)
- 3) The numerical value of the Patriarch Enoch (84)
- 4) The numerical value of the term LaT ("hide") (39)

In sum, we reason as follows: 45 plus 39 equals 84, over 84, giving a total of 168. And this number is precisely the result of the sum of odd numbers between 3 and 26.

In addition it should be noted, moreover, that the number 3 is the expression divine, and 26 is the numerical value of the sacred word IEVE.

Then 3 plus 5 plus 7 plus 9 plus 11 plus 13 plus 15 plus 17
plus 19 plus 23 plus 25 equals 168.

And if we add 360 to 168 (the degrees of the circle, expressing I manifested universe, we get 528, which symbolizes the term: MaPhTachH, that is precisely a key.

528 plus 532 equals 4.

The number 4 is important because not only means the 4 points

cardinal, the 4 major constellations, the 4 elements, 4

seasons of life, or 4 moon phases, etc ... but also

represents the fourth letter of the Hebrew alphabet, DALETH. But this symbolism of the letter D also has its significance because daleth is the UNION, in the sense of the Macrocosm and Microcosm meeting, link between external and internal, in the Hebrew purposes, as for the Chinese in their alphabetical parallelism: a threshold!

532 is the combination of solar cycle 28 and a lunar cycle

19 years old. Like this: key threshold and characterize the equilibrium (in balance), similarly to BeTheCel equals 532, and, behold

is felt all the deep science of the ancient rabbis.

But alas, all this gradually lost the true doctrines

of the past were forgotten, and F.: M.: After the

Constitution of 1717, was lost in humanitarian conceptions and all came to be "outside". But instead it has preserved the rituals that even in the hands of the most conservative sects, have expired after a certain time.

We know for example that Padmasambhava (the founder of

Lamaism in Thibet) imported from India apart from Buddhism

Tantric, custom and ritual voluntary intoxication, which

existed, moreover, in Tibetan Shamanism, but it was

Outlaw and, moreover, in Tibetan Shamanism, but it was

proscribed by the reformer Tsongkhapa in the fourteenth century. These

excesses were not tolerated at any of the initiations worthy

this name.

115

As you can see real chaos reigned within the Freemasonry (grades 33 well known this mission to reign "order" amid the "chaos") both from the esoteric point of view as from the administrative, and still have to add the theme of your humanitarian mission, so often confused with anticlericalism.

We touch here a problem of two pontificates. After appearance of the Messiah Jesus, time is divided into two periods on the Salvador victim atoning (ie, the Era has just happened), and

time of Christ the King, the Messiah and shiny wash insults
(Golden Age is announced).

Holy books Announce papacy for each of these times: the time there is the spirit of Pedro who came through their successors (the popes of Rome), until the day that the expansion of Holy Spirit will be felt and John begin his ministry of love and will live in the soul of the new potatoes. The pontificate of Peter must finish as the coming of the Son of Man, the return of Christ Glorious, the current Universal Messiah coincides with the period (the New Age, the Aquarian Age symbolized by the sign of the Water Bearer, the Sign of the Son of Man).

Naturally the great eras not end brutally, there always a transition period, the end of an era is introduced into the beginning of the new, and the manifestation and makes us feel, but after two or three decades sometimes. Also, a new Christ is not immediately recognized by ALL, but are their disciples gradually do recognize the coming of this Messiah, symbolizing the dawn of a new Era.

The pontificate of John corresponds to replantation or manifestation of Tradition, as announced by the cycle Revelation (descended from the heavenly Jerusalem on earth). It you can read in the Gospel of John (Chapter XIII, vers. 21 to 26) Peter has to resort to Juan and later (Chapter XIX, verse 26.) you can see all the importance that the Master gives John his disciple preferred. Finally, in the same Gospel, Chapter XXI, vers. 18, it reappears when Peter is old and another is presented. These obviously Peter's Church, which will place a new papal sovereignty. Verses 20 and 21 denote very well that two disciples should have a major role, and the next verse, 22 gives the conclusive idea.

There are therefore two heads, one for the exoteric church and the other for exoteric temple. Peter apparent leader, the man of faith, and John Head secret, the man of science. The two of them leave their successors, shall be a public movement leaders, other dignitaries of the Preferred Community.

Often been confused with the initiatory writings political pamphlets. There is an example in Divine Comedy Dante Alighieri, some have believed to see in her written texts for member of a defeated party! ...

The term brother often appears in Dante's pen, in Chapter XVIII, the "Paradise", he also speaks of the signs of recognition of touching, as well as "DI" and "L" draw angels and are the initials of the motto: Diligent Justitiam employed in Freemasonry. In "Purgatorio" (Ch. VIII) Dante gives three steps to the judgment ... The language is very meaningful to those familiar with the lodges The embrace of San Peter Dante in Chapter XXIV of "paradise" greatly resembles Wise way hugging the Rosicrucian Chapter. And so Also, some other details that allude to the provisions Temple, in particular the three steps of the seat of the state Venerable, the symbolism of the three-year apprentice, the three virtues: Wisdom - Strength - Beauty, etc ... In Canto IX "Purgatory", he needs to climb three steps (white, green and red), and those colors of the Italian flag (which has a Masonic origin to Like the flag of Mexico), are the same lining the bottom of the Lodge of the 26th degree of Scottish Trinitarian. Allusions to travel, the grades achieved, and a multitude of symbols and emblems, witness the Initiation value of the work of Dante Alighieri. Besides writing the same way as the succession: Hell -Purgatory-Paradise, offers with the decrease os obstacles in Masonic travel, as it approaches the goal.

The Masonic mode hides under simple words initials followed by periods, is used often by author Divine Comedy, who often makes regarding the degree 18 of the Scottish very frequently, for example in the chapter on Paradise, XXXI song, which begins: "In the form of a white rose presented itself to my view the Holy Militia, in which the Christ marries his blood "... In song and song XXIV XXV the author speaks of the pelican, allusions to rise ... lost word frequently appears the term valley and the convents words, councils, the

Sons of the Widow knew well, in addition to references to the major symbols of 30th grade (eagle, ladder, etc ...). The examples are numerous and do not want to emphasize each who may reread this wonderful work. We only allusions to reflect on the need to deepen much more in the Initiation documentation. Initiation can not only be transmitted through an organization regularly constituted, but must also be in its condition of Light to be transmitted, in effect, there must be something that will

to be given to the followers. It is not enough that an institution is said Initiation to have any power; teaching is required, the while providing a spiritual power in succession, order to ensure this traditional chain.

The rite itself offers no value if it is not understood or simply understood in its real sense, the essential elements of a ceremony rely on the use of a mechanism, which should become one Master to have Initiation feature one, because otherwise falling into a Regular movement, which would be as valid as if it had little been made by an ordinary layman. The religious rite requires ordination, and one who has not received this ordination although do well whatever he wants, observe the same rules and put all of your best intentions, this does not do you any good, because the result will never come. The spiritual influence is the basis of all the initiatic transmissions, and the operator does not use forms rituals rather than as a point of support, as in the rites of a sort by all lower aspects, such as the simple ceremonial magic, which is not involved almost nothing "spiritual". Without But it is essential to have psychic resources; production of a true effect is conditioned in many cases to certain transmission and even the most vulgar shows us that witchcraft field witch never dies without having transmitted his secret (his gift, his power).

We know how important it is for the Christian churches apostolic succession, which is easily understood. Churches Protestants, who do not support the priestly functions have deleted almost all the rites, or retain only some simple way of Memorial drills (which lack of effectiveness). This is known discussion that has arisen with regard to the Anglican church, and it is interesting that the same theosophist when they wanted to be their Liberal Catholic Church, sought to all make a regular "apostolic succession."

In short, even perfect knowledge of a ritual, whether it has been I obtained outside regular conditions, is entirely devoid of any value. For example, to expose the point simplicity, we will take as a rite model reduces to a simple expression, ie the pronunciation of a formula. Tradition Hindu Mantras provides that when making only imitating movements and the sound from the mouth of a Guru has no effect, mantra that said has not been quickened by the influence spiritual, which must be designed to serve as a vehicle. In this

regard, it should be noted that in India no disciple can sit in front of the face Guru, to avoid the action of prana, which is attached to the breath of the voice, to be exercised very directly, does not produce a shock too violent risks that could cause psychic and even physical. This is also one of the explanations used in the placement of chairs and seats in the lodges, and unfortunately most of the present Brethren Masons are far from suspecting.

All initiatory transmission proceeds more or less directly from spiritual centers, spiritual centers together, united them same to the supreme center, which retains the deposit Primordial tradition.

An initiatory organization can not proceed directly from supreme center, but the secondary centers, as in all organization has a hierarchy that allows for elements much more evolved, the evolutionary state represented by the organization to which she belongs. These elements are used in a way of true Initiation Transmission bases for which no can be done in this case but very slowly.

In other words, certain Officers with very Initiations above, can be introduced into organizations called Initiation and only occupy positions of a lower order, say side, to watch and infiltrate slowly the True Tradition Esoteric. It is the mission of some great masters, to be well incorporated within certain movements with the same title the other members.

The goal of every organization is the same, but their Tradition participation in the demonstrations accompanied own time and place, which results in their differentiation exterior. Unfortunately, these various drafts have had several sometimes unpleasant consequences, as they have affected the internal same movement. As we have seen, among the members a secondary center, arrives to have someone who has actually a personal embodiment of a higher degree than in the one placed, as have been granted, however, another well below its evolution, and sometimes can only work very hard, for lack of authority of degree. The existence of this overlap is one of the reasons why the study of organizations Initiation is, of course, so hard in his breast, that members

most of the mechanism not only ignored but also its own situation.

Thus, it is understood that in some occasions, elements not belong to such organizations (understood in the sense coated organization legal form), may preside in some cases, training, organization or administration of similar institutions. Here is the true meaning that the Freemasonry has always had about these **higher**

Tradition has been able to survive, despite the disruption of certain Initiatory fraternities or secret societies, and the chain is Initiation, rotates on its exoteric in its ostensible organization existing remains anyway, thanks to these

Individualities exceptional. This often occurs during periods when civilization almost completely lost its spirituality, and then goals Iniciático order are more hidden than usual.

It's a shame to see how the authors of the seventeenth century and rituals XVIII, suppressed the essential parts of the Tradition, and value ignoring him pass, only what they transmitted found "them" interesting, but without going to know what it was exactly, these naive and truly left the party esoteric, just because they were in embarrassing situation clear language to translate this cabalistic hand, or literature Initiation rabbínica simply.

The Sacred Fire of Freemasonry burned for more than 2,000 years in the sanctuaries of Egypt, where the true Mysteries were revealed. After several centuries of silence during which the civilization stagnated and Freemasonry also slept in a profound indolence, it again showed signs of life at the time of the Crusades, it must be recognized that previously was brought India to Asia Minor, and thence to Europe apparatus that period. Do not lose sight of the very popular term LODGE comes from Sanskrit **Loka** meaning: World. It is known in fact that the world is a lodge and workshops are part of this universal lodge. The composer Mozart was a big brother Mason, and even when death snatched too early (he died on December 5, 1791 at the age of 36 years), has made famous works for the institution.

Wolfgang Amadeus Mozart, is primarily the author of the Masonic Funeral Ode, composition for orchestra, written in memory of Bro. M.:., Jorge Duque Augusto de Mecklenbourg Strelitz and Count of Galantha Esterhazu Francisco.

Praise of Friendship is a sung text inspired by a H.: M.: Emmanuel Schikannede (author of the libretto of The Magic Flute).

Mit uns Lasst geschlungen haesnden is a hymn to universal brotherhood, which was adopted in 1946 as the Austrian National Anthem.

Die Freude (text: Joy, Queen of the Elders) is also a masonic poem, the which put ma in December 1767. It is a small aria with accompaniment piano and words of JP Uz, that Mozart dedicated to the daughter of Dr. Joseph Wolf (1724-1778), in recognition for having been her savior during epidemic smallpox in Vienna.

Or Helliges Band is the ritual hymn of H.: M.:., Composition dates from 1772, but the formal adoption at the Viennese lodge for Charity, just comes from December 14, 1948.

This work is very symbolic, especially the second piece in DO-Retail (3 flats 3 large 3-note chords) and the fifth for his musical Triades; her was a great success in 1779, and Mozart resumes Artwork to adopt a new script, taken from a French piece of Lemierre A.: Lanaza or Widow of Malabar.

After traveling for 10 years, fixed his abode in Mannheim, where he became friendship with the Weber family (Constance, the third daughter became the wife of Mozart). Otto von Gemmingen Knight, lawyer and notorious H Heidelberg. M.:.

It was Mozart who put in contact with the French lodges.

In mid-eighteenth-century Paris, the M.: created concert fans (Later Concert Olympic Lodge), and instructed Joseph Haydn (who he joined in February 1785 the Viennese Lodge, Concord True), a series 10 symphonies for orchestra, which later became the Parisians Symphonies, the which the most famous is the 85th (Queen).

Semiramis, which is a melodrama set to music by Mozart in Mannheim, when

collaborated with Herr von Gemmingen in the theatrical field, in this same time appeared: Deir Seele Weltalls dees, Masonic cantata.

On January 7, 1785, Mozart is exalted to the second degree in Lodge Charity, being the great Master Baron Otto Von Gemmingen, who was Some years ago the founder of this lodge. It was in this period that Mozart wrote a number of works for wind instruments. The Adagio clarinets, bass and bassoon, and **the Adagio** for two clarinets and three low (in B-flat) date from the last years of his life. This composition is very symbolic for Initiates, because that noise is heard Masonic mallets.

His father, Leopold Mozart, worked as seriously in the Brotherhood, the April 6 1885 he earned his second degree, and 22 of the same month the third grade. It was in Introduction to the occasion of this second degree, Wolfgang Amadeus Mozart composed the melody Gessellenreise (Canto partner in the two-tone flats, symbolically chosen).

Mozart also composed the Cantata Die Maurerfreude (Joy of Masons) in honor Ignaz von Born Sage (Gr.: M.: L.: A true Concordia), and with which Mozart himself was received in August 1791 by his brethren of the Lodge A Truth and Union, upon arrival to Prague for the premiere of his opera La Clemencia di Tito.

Finally the composition of the Funeral Ode, dated November 1785 and musical motif begins with the words expressing ET Mortus EST in Coronation Mass. At this time the Emperor Joseph II reorganized the Lodges Viennese, the January 14, 1786, Mozart wrote four songs for chorus and piano accompaniment, to celebrate the fusion of the lodges with name: A Newly Crowned Hope, and then his great works teachers, concerts, symphonies, sonatas, quartets, operas: The Marriage, Don Juan, Cosi fan Tutte and The Magic Flute, this magnum opus to great Initiates.

The Rhetoric, or the art of speaking well, is left aside with frequently in the lodge work, and yet have much importance for mastery, not simply to "cultivate flowers of rhetoric"! ... Or at least have the elements for recognized at the lexical garden.

The GRAMMAR, which is the way to write and express correct their thinking, is part of this baggage finally indispensable for Bro. M.:

Before ending remains to mention a word about the famous philosophical cross, drawn in a circle of 360 degrees, being It consists of 12 equal sectors, representing the 12 signs zodiac and the 12 months of the year. We see also in this cross: the 4 seasons, lunar phases 4 and day and night the two halves of the circle area, thereby delineating the hours day and evening hours.

Life Principle, which corresponds to AIR, is the first essential element for our development side is Eastern (spring symbolizes the element air eastward); towards the top of the cross we see the FIRE element, which is He characterized Alma, is the symbol of the creator element Universe (the strong summer heat). To the West, the part of world that contains more humidity and that this cross corresponds to the WATER element (which comes to characterize the same fall time), which demonstrates that the Earth has needed this liquid sky, like mankind requires liquid semen for production ... the north is symbolized EARTH (s winter), this essential element forming portion item

for the rest of being, so this part is down (the merely cross their cardinal directions follow the same Zodiac movement, contrary to the views geographical, showing up north: south is here up, as the sun at noon is on your meridian and the base represents the north, which is the sky background in astrology).

Northern Earth is much less populated than all other parts, is for men to learn to meditate on death, to which each must undergo. It is the dream of the night ...

At the center of the cross, the Blazing Star is a delta between. Outside of the cross, there is another symbolizing the lunar months 28 days 2 hours 17 minutes and 36 seconds (that Islam is still in today). She called the Cross and Hammer has the number 13, linking you to that 12 will then: 1312 (date also symbolic, especially since the demise of the Templars), number

It is known that the pass word of Ap. means possession worldly, and is also the name of the Son of Lamech. Word Sacred Comp. means perseverance in good, and is contained in the 4 elements of the cross in the middle is the pass word of this grade, which means numerous as the ears of corn (is the description of the propagation of the followers of the Order). A similar cross contains the degree of Master, and their eight angles form the sacred word, which many believed to have been applied to the death of Irma, since it means: meat separated from the bones! ... The pass word of this grade ago allusion to those who escaped persecution.

We can, however, proceed with all the details of this cross, which allows analysis of each grade with the words corresponding. However, it is desirable to provide it reflect on the role of each Masonic degree.

Too often the H.: M.: lose sight of the need for a relentless work for something useful, and not be isolated into a silence anti-Initiation.

In this respect the ceremonial of the second degree is very significant provided that does not simply a ceremony without the spirit of the sacred.

So when the two Rangers have repeated ad introduction, the Venerable given five strokes of a gavel, followed by grade battery and pronounce the Proclamation (all H.: remain standing and order, and the new Initiate is placed between columns. "To the Glory of G.: A.: D.: U:., To proclaim now always H:> ... as partner (second degree of the Order) and I invite you, Bro. To me, Bro. H.: mine."

(The sign and the battery level and all H ago. H.: Imitate).

Then the Venerable says, "Come, my brother, to receive the commitment of the eternal covenant that unites us "(and gives the kiss of peace).

The new partner giving thanks to Ven. and Workshop members.

When the Great Expert raises 5 allegorical bleachers

new **partner**, gives the following explanation:

The first step symbolizes **patience**, virtue is that we gives the ability to support any period in which we find, and is the mother of indulgence, so necessary in each one of the situations of life. The sweet and patient man interested worldwide. You have to train you for a universal moral and perfect your soul, in order that all the actions of your life be consecrated to sustain society,

promulgation of good deeds and the welfare of your fellow man.

The second step symbolizes **moderation**, which is the virtue that govern and regulate our passions. Indeed it is by prudence we hold our desires, our efforts and actions within boundaries that shape towards goodness. Moderation is the hallmark of a calm spirit as well as the source of the greatest blessings we can enjoy themselves here on Earth. Could it be disenchanted every day who can count and mention a thought or a generous action, made the day before? Or that being all Love pours around a real affection, friendship, cuddling, and then harvest the seed he has sown? For him, Bro. mine, the life will be prolonged sleep of enchantment.

The third step symbolizes prudence. It is a virtue is to foresee all the consequences of taking a step, or leaning for or against something, and the reasons that encouraged to do so or to avoid the difficulties that can be found to act in certain ways, the means to be employed for

ensure success. Wisdom demands that the purposes are weighed, the media, the chain of consequences, risks, opportunities, barriers and outcome; prudence, finally, Invoked we have to relegate all you can do damage. There to sow the world the word prudence, teach your similar to perfect the useful arts, love one another and give a some light to those who are perishing along the paths of vice, instruct ignorant and solace to those who suffer.

The fourth step symbolizes **modesty**. This virtue is not misuse the talents and virtues, not judge too favorably to ourselves because it offends our similar. Alone is capable of disarming modesty envy. All be really outgoing, must gird itself for understanding human weakness, resist the impulse of self-love self-centered, Hate brings consequences, the virtuous man should want the good opinion of his fellows, and walk away for these purposes if with his arrogance, his pride, his presumption, and vanity, could

afflict humans who aspires to deserve love. The Modesty is a virtue worthy of admiration, is a kind of varnish that either enhances this natural talent, or acquired Modesty is for virtue, so the veil for beauty.

The fifth step symbolizes the **sweetness**, state of mind and the heart that gives us when we receive moderation offenses, making us the obstacles that patients have to experience, reassured by the diseases we suffer.

The sweetness is manifest through the circumspection with which talk and we spread, as well as accompanying decency all movements. It is the opposite of irritation, anger, of violence. Predisposes to charity and universal benevolence, and in short, it is useful to fix all tumultuous passions and irascible the soul; predisposes us to be more sociable and friendly.

H When the moral faculties are developed. mine, the reason increases and blessings path becomes longer and easier.

Penetrate all these truths, and I will give you more affordable account the moral sense that enclose 5 iconic travel you have just meet now. The path we have followed and ushers the end of life, like the sun in your eyes symbolizes each day. The crude stone should be polished their deformities. But ah! Many Lodges in no longer respects ancient ceremony with all its sacred items. Multitude of Bro. M.: they have not understood all the philosophical depth of the ritual, still ignoring it is essential seriously meditate on each word in every attitude, etc ...

Each Masonic degree itself represents a life, a work, an ideal, and while that's not been consummated, it is not may be eligible for a salary increase ... The H.: M.: sincere, not You can aspire to move from one grade to another superior, if not previously has **done** completely the degree to which it belongs. Understood this requires a long meditation, after studying While this degree, which is frequently taken as a esoteric and just moral sense, but almost never in Initiation. The real value, the real sense, it is almost always forgotten.

The first three grades are directly related to the architecture and the symbolism of the death of Hiram. NO, however, no need to stick to the simple lesson, even philosophical, emanating in those grades, but also have sufficient documentation to respond to art, very difficult to build.

The 4th grade recommended discretion, and is a huge mission to live the fourth word of the famous axiom: **Know - Will - Dare**

- Callar ...

The 5th grade symbolizes misfortune of ignorance, and would practice not to exceed this level too quickly, and take other work to think seriously about the true meaning of that symbol for the H.: M.: Before being exalted higher, Carefully check your statement and also monitor their development of virtue. To this extent, and are the high problems and says in effect that the Perfect Master knows circle and square.

The 6th grade notes the risks of a proud curiosity, and 7th is dedicated to justice, which also requires the qualities that are often ignored, otherwise the new promoted.

The 8th grade invites the spirit of the order, but also demand special knowledge of sociology and the ability to overcome difficult problems of organization.

The 9th, 10th and 11th grades, leading to think moral world. (The same dignitaries constituting Chapter Rosa Cruz, are what give these middle grades).

Year 12 is like a stepping stone to the great progress indispensable to be made at this point and he is studying three forms of architecture (civil, naval and military).

The 13th penetration encourages and requires especially documentation of foreign affairs of the Order.

The 14th represents relation to the unit and must prevail here idea of sacrifice, in order that in the H grade 15. You can actually attend to their own, it is the symbol of heroism which characterizes this stage combat.

The 16th degree does expect a reward of merit, but then he has to show them palpably.

In the 17th grade, working for the meeting of the Elders and propagation of doctrines, so it is a very difficult degree, since it involves a huge dose of psychology.

Finally, the 18th grade is so beautiful way, that most of H: during this period do not aspire to go beyond this level.

Deep peace, as stated in this degree, and in fact corresponds to the lighter than expected, is the state of wisdom that no longer is affected by the outside world. This is how members this chapter Rosa - Cruz should worry about all of the transformation of physical forces in psychic powers. It is in this to be made next to the Great Transmutation, symbolized by famous INRI, which we've talked enough. The 18th grade is effectively abandoning all passions, abstaining from all vices, is the perfection of the individual, who has become MAN in every sense of the word, and it is in such Christos sense that this word was also awarded the Knights Rosa - Cruces. The insignia of this degree are very significant: the pelican chicks and providing water in the Mystical Rose on the Cross ... This stage teaches virtue, philanthropy and naturally deep philosophy, but it is especially here where performed the Great Work of Spiritual Alchemy.

The 19 degrees is what is symbolized by a square tower, suggests that the righteousness of the customs, wisdom and regularity of the Laws.

The 20th, demands absolute self Master **ad vitam** tata announced that a continuation of the previous grade and confirms the Masonic pontificate that involves knowledge perfect to direct the work.

Page 124

The grade 21 ° corresponds to austerity and meditation.

The 22nd is where you take the time to trace the works necessary for reconstruction, it requires for this period

great knowledge of geometry and materials, both in that material and philosophical. These have a great firmness and good organizing skills.

Grades 23 and 24 ° are related to moral Pontificate about which much could be said, but for the restricted framework This short analysis, it would be too long. These warning periods do object to superstitions, which should be studied thoroughly in order to debug the legends and give a Healthy and pure disciples of Light Power.

The grade 25 is referring to the mythological grass (the vid), which is the emblem of wisdom, mastery of the passions with the analysis of the consequences, to give strength and vigor to which are entrusted with a responsibility here. The famous INRI Reappears with the name of Moses. Metaphor is also studied a snake which Moses made up at Camp the Israelites. This passage from Exodus, chap. IV, vers. 3 and 4, it is rich in teaching, as we have seen

56

The 26th grade scores Transportamiento the Third Heaven, ie the region where men, by the nobility of their feelings and lights that project, meet above their prejudices. The VERITAS word orna this degree and its members are precisely the Brothers of Truth (the third signal makes call: **Elai beni Emeth**).

The 27th degree, is closely linked with the history of the Templars, and the study of Gnosticism is here also very important because this degree is to conserve precious doctrines Egypt and its correlation with the high initiatic teachings Zoroaster, as well as the fundamentals of the Essenes. The aphorism of the sacred word is more significant at this stage once, in which the allegorical axiom INRI also takes all its meaning.

The 28th is somewhat like a higher grade repetition 14 °, ie, the higher octave of work that could not be Initiates demanded, without having gone through the great degree of transmutation is the 18th. The arts and sciences are honoring to this extent, it is the constant work to improve the

intellectual work as necessary to provide a possibility balanced teaching about all dogmas. Also this step is a step off where you talk at length about the study of nature, through microscopes and telescopes. Unfortunately this grade has also suffered numerous and repeated deformation, and even in the ritual are flagrant anomalies. Many lodges, for a long time, no practice, for example, the ceremonial presentation with touching for that range, and pronouncing the words Alpha and Omega. The fact that this practice is not already in use, obscures one stroke values that bore a deep symbolism. The answer to be given is still discussed before the announcement of the sacred word: many lodges do Abrag respond, however, the Convention of Lausanne held in 1875, was passed to stop this degree had to respond **Gadol**, the announcement of the sacred word. All this is provided pitiful, because there really is a serious reason for using rituals in this or that word.

The degree requires 29 ° extraordinary scientific training, since it leads to the degree of Perfect Master in Kabbalah (the Knight Kadosh grade 30 °). At this level is therefore requires a saving preparation, equitable solution to the problem Masonic. The review covers the issues of higher education, stands for physical, moral and intellectual levels. Since the ritual is very complicated in this period: seven signs three touching and different general appeal.

The grade 30 grade is full of severity, is the step of Purified. His title of "nec plus ultra" indicates very well that There is nothing beyond that really is the last degree. The Assembly named after Senate dignitaries addressed the work of Areopagus, and confer the degrees below 19 ° to 30 °. In a way, it is the last stage of evolution, for the other three degrees, are intended rather to a feeling of honorificación. The 30th grade is the ceremonial Perfect Teacher and its symbol is the Holy Qabbalah, teaching has the perfect knowledge. Instructor - Superior in cabbalística doctrine Here is the exact title for this grade I corresponds to the last Masonic period. There is no doctrine that is not included here because Man or Holy-Holy-Purified as KADOSH means is one who teaches the highest doctrines of both the abstract and of the concrete, its domain is the Knowledge. Nothing should escape his knowledge and H:. M:. should not accept this degree without having absolute knowledge of the Secret Sciences and Sciences

University. Titled both the secular world and in fields esoteric, Knight Kadosh is providing documentation necessary for lifting the masonic scale. It's like "God I want "as the emblem of the white flag, crossed by two green stripes. The Initiate at this stage is like a real living library, nothing is strange or philosophy or physics, astrology adding your archaeometric Saber, knowledge of the sacred languages due to the translation of ancient texts both, as symbols or hieroglyphs of patriarchal worldviews.

This is where we must summon the continuation of small analysis of the mystical ladder, which had begun to talk about 7 liberal arts, represented by the crossbar from the left this symbolic ladder, known as the Kadosh. Both this mysterious ladder stringers are called Eloah and Ohed Ohed Kerobo, that is, love of God and love of neighbor. The right bar (Deum Amans) has seven steps as so many virtues to be practiced and taught:

TZEDAKAB (Justice):

Compliance with laws and accordance with the actions

SCHOR-LABAN (Purity): moral chastity, required for improvement

MATHOK (Sweetness): Education and reflection to be fortify the Master.

EMONUANAH (Faith): Vigor Soul provides the verve and strength of spirit to the Initiation elevation.

AMAL-Saggi (Work): The ability to apply all remedies against pain.

SABBAL (Load): Do not be affected by the acts of the sentimentality

GHEMUL-BINAH-THEBUNAK (Prudence): Provides force to achieve the set goal, includes circumspection in words and acts, prescribes the use of the virtues, the study of science and universal morality.

It is unnecessary to give the details of the last three degrees symbolize the White Masonry, which, as its name implies, and not considered within the dynamic effort of the preceding degrees; she has this **EXPERIENCE** (somewhat true Matesis mode). Until the 30th degree, the Master fight all forms and all the verve that can characterize a H.: M:. It is the job of all their powers to climb the ladder Initiation, which is reached in the rank of Knight of the White Eagle and Black, regent of the

two worlds: the visible and the invisible. The two heads of the eagle Masonic not represent the two hemispheres in which Institution must preach, but Darkness and Light which must get to know, are the two poles of Magic, the power to acquire, not to abuse but to eliminate the partners in the struggle against negative forces. The 30th grade is the limit of these struggles, the These grades correspond to the use of the experience that has obtained for these efforts, and the knowledge is acquired then by the Way of **Conducting** and not by study intellectual.

After the symbolic degrees (first 3 degrees), the Chapter degrees (4° to 18°), the philosophical degrees (19° to 30°), we are in the presence of the top two grades (three upper grades).

The Grand Inquisitor 31 grade, especially for monitors that not abuse exists and must ensure that the laws are executed Masonic correctly.

Sublime Prince of the Royal Secret, 32nd degree, used in their signals passing between the words, the word Shaddai, with which Flashing their depth knowledge of the Word.

We have already addressed the issue of these Logos (Hebrew Shaddai). Unfortunately, as always, these terms during the time, have suffered deformation even in the way of writing aye, and is just the orthographic form assumes a significance capital for the values that need to agree.

Shadai, with guamétrico value of 316, is the Shva Vattan-DHA, is the Vedic Swadha, Isho assimilated to Jesus, who does VERB.

Shadai, also called small Shadai has value

314, which corresponds to 3.14 of course universal formula Pi, expressing the ratio of the diameter with the circumference. It is in somehow the key to finding what this unknowable mystery of creation, symbolized in its manifestation by the circle.

Shadai (Shin-Dalet-Yod) is the protection of the Israelites, is pantacle as a universal, divine wind that accompanies them.

Finally, the joint response of the sacred words, 32nd degree initiates bring out his magic Saber, through Name one interpolarización daily deal. The mention of Prophets of Geniuses, etc.. Attest that all branches of Knowledge not are secrets to H.: M.:, Who have reached this state.

The Grand Inspector General of the 33rd degree, remains the largest respect for Jacques de Molay. The same battery in this degree, is

-

ing eleven strokes, which are made in a way that recalls the date was sentenced last Grand Master of the Worshipful Templars.

The Grand Inspector is received by the Pod. Sob. Great Commander (which is the First High Dignitary of the Supreme Council of the 33 who will ask the sacred word, and confirm that G only. A:. U:. you can understand it. The event is severe, the newly admitted gained the top step, has seen all Masonry and meet the Master. In addition, it must demonstrate that its heart no longer flinches.

Finally, the last three are rather honorary degrees, is the Initiation crown, the recognized supreme authority, the last step of this esoteric rise divided into 33 degrees, which represent all the possibilities of life, all the steep slope the Shining Path that leads man from darkness to the sublime glow of improvement. It is a long way, the stage of the passion to virtue is the way of the ignorance to knowledge, is the cavalcade begins in the world layman to conclude in Initiation, in every sense of the word; that in virtue of which the stone becomes gold, because it has understood the reality of the universal world. With his face to the eternity, the Initiate thinks only contemplate the wonders of Cosmos and live in the blessing of the G:. A:. D:. U:.
